DR Abu Bakar (kiri) diiringi Dr Arshad (dua dari kiri) melihat permainan 'Belonkak' yang dihasilkan pelajar PIS.

Pasir Gudang: Kementerian Sains, Inovasi dan Teknologi (MOSTI) sudah mengenal pasti faktor sebahagian besar produk dihasilkan penyelidik di negara ini tidak dikomersialkan untuk pasaran tempatan.

Timbalan Menteri Sains, Inovasi dan Teknologi Datuk Dr Abu Bakar Mohamad Diah berkata, ia bukan kerana produk dihasilkan tidak berkualiti dan bersesuaian dengan kehendak masyarakat, sebaliknya sikap segelintir penyelidik enggan menggunakan sendiri ciptaan mereka.

"Kita perlu akur dengan mentaliti sebahagian besar masyara-

kat Malaysia yang tidak berani mencuba sesuatu produk menggunakan teknologi baru.

"Malah, golongan berkenaan lebih gemar melihat kesan penggunaan sesuatu produk kepada individu lain sebelum mencubanya sendiri.

"Penyelidik di institut penyelidikan, institusi pengajian tinggi (IPT) awam dan swasta perlu menggunakan produk mereka terlebih dulu bagi meyakinkan orang ramai," katanya pada perasmian penutup Karnival Kerjaya, Inovasi dan Keusahawanan (ICE) di Atrium Kompleks Pusat Bandar Pasir Gudang, di sini.

Hadir sama, Pengarah Politeknik Ibrahim Sultan (PIS) Dafuk Dr Arshad Kassim, Yang Dipertua Majlis Perbandaran Pasir Gudang Onn Jabbar dan Pengarah Program Karnival ICE 2013 Mohamad Yusof Sulaiman.

Dr Abu Bakar berkata, langkah proaktif perlu diambil bagi memastikan usaha mengkomersialkan lebih banyak produk inovasi tidak terbantut.

"Ada penyelidik terlalu melindungi produk mereka daripada berkongsi kebaikannya bersama orang ramai dengan alasan belum dipatenkan dan tidak sesuai untuk digunakan," katanya.

FORUM

The World Innovation Forum Kuala Lumpur (WIF-KL) is the region's premier annual event on innovation that aspires to create a new culture of innovation, and is to be held at the epicenter of economic growth, emerging technologies and innovation in Asia, Kuala Lumpur. The event runs over three days and consists of conference, exhibition and award ceremony. The event brings together innovation leaders, policy makers, industry players, thinkers and innovators from around the world to share ideas and discusses issues related to innovation. The forum was an ideal platform for high-level stakeholders to share on experiences, as well as discuss and deliberate on issues and strategies for inclusive innovations.

EXPOSITION

The WIF-KL 2013 Exposition is a world class exposition covering the entire cycle of innovation which include grassroots, education, commercialization and integration of innovation to propel the region toward high-income, advanced economy nation.

NS BlueScope hosts green visit

GOECO: Vietnamese architects visit GEO

NS BlueScope Malaysia (formerly BlueScope Steel (Malaysia) Sdn Bhd), the leading manufacturer and distributor of coated and pre-painted steel hosted a visit to the Malaysian Energy Centre or the Green Energy Office (GEO) Building in a tie-up with NS BlueScope Vietnam.

The Vietnamese architects visited the first completed green-rated office building in Malaysia in 2005 and the first (Green Building Index) GBI certified building equipped with sustainable features including energy-efficient office equipment, photovoltaic system and a green library. NS BlueScope's Clean COLORBOND® steel was used as a roofing material for the building that employs infra-red technology in maximising the reflection of solar heat and steers radiation away from the roof area.

"The Malaysian government encourages green

Vietnamese architects visited the GEO Building.

policies transformation with the Income Tax Exemption for GBI certified buildings, Sustainable Energy Development Authority (SEDA) Act and SIRIM (S)Eco Label," observed Pongsak Padungkarn, recently appointed NS BlueScope President for Malaysia, Singapore & Brunei. He added that the company promotes environmentally-minded building materials and was the first coated steel manufacturer in Malaysia to receive the SIRIM Eco-Label for Flat Coated Steel.
