# Penguatkuasaan lemah punca aktiviti sukar dikekang

Oleh LUQMAN RIDHWAN MOHD. NOR dan AHMAD MUSTAKIM ZULKIFLI

**LAMBAKAN** kilang plastik haram di daerah Kuala Langat, Selangor bukan isu baru.

Kilang-kilang itu yang beroperasi di Jenjarom, Teluk Panglima Garang dan Banting dilihat semakin galak beroperasi dengan ada antaranya dioperasikan oleh usahawan dari China.

Majlis Daerah Kuala Langat (MDKL) yang memainkan tanggungjawab besar memantau operasi kilang-kilang tersebut boleh dikatakan tidak menang tangan menjalankan tugas berkenaan.

Menurut Yang Dipertua MDKL, Mohamad Zain A. Hamid, biaarpun operasi berspadu dilakukan bersama agensi penguatkuasaan seperti polis, Jabatan Alam Sekitar dan Jabatan Imigresen, kilang-kilang tersebut dilihat semakin

ZURAIDA ketika meninjau sebuah kilang memproses sisa plastik haram di Telok Panglima Garang, Kuala Langat semasa turun padang pada 25 September lalu.

bercambah.

Katanya, bermula dengan belasan buah kilang yang berjaya dikesan, angka akhir menunjukkan lebih 40 premis memproses sisa plastik yang diimport dari luar negara beroperasi di Kuala Langat.

Beliau menjelaskan, ia ekoran lokasi tersembunyi kilang-kilang tersebut yang terletak di ka-

wasan kebun di sekitar daerah Kuala Langat.

"Bagaimanapun, kita berjaya mengesan kilang-kilang tersebut berdasarkan maklumat daripada orang ramai," katanya kepada *Kosmo!* baru-baru ini.

Beberapa siri pendedahan oleh akhbar *Kosmo!* sejak 23 Julai lalu sedikit sebanyak merungkai isu berkenaan yang rata-ratanya

mendapat reaksi bercampur-aduk daripada pelbagai pihak.

Di pihak orang ramai, ada yang tampil mengaku begitu terkesan dengan asap daripada kilang plastik sehingga terpaksa ke klinik kesihatan bagi mendapatkan rawatan.

Menurut Mohamad Zain, MDKL juga berhadapan kesukaran menjalankan operasi kerana kekangan kerjasama daripada agensi tertentu.

Dalam pada itu, Kementerian Perumahan dan Kerajaan Tempatan dilihat tidak tegas dalam menangani isu tersebut kerana keputusan demi keputusan yang dibuat menunjukkan ketidaktetapan pendirian mereka.

Biaarpun Menterinya, Zuraida Kamaruddin pada 26 Oktober lalu mengumumkan akan menghentikan pemberian Lesen Import (AP) sisa plastik, keputusan itu bagaimanapun berubah be-

berapa hari kemudian.

Pada sidang Dewan Rakyat 1 November lalu, Zuraida berkata, pihaknya bercadang meneruskan pemberian AP sisa plastik kepada syarikat yang layak.

"Kita juga berpandangan bahawa pengharaman serta-merta akan menjelaskan industri pemprosesan sisa plastik di Malaysia berikutkan produk plastik yang dihasilkan dalam negara bakal dieksport ke negara luar," kata kementerian itu menerusi jawapan bertulis.

Kupasan terakhir isu kilang sisa plastik disiarkan dalam sekyan *Kosmo!* 2 hari ini di halaman 21, 22, dan 23.

● Penulis laporan ini, Luqman Ridhwan Mohd. Nor dan Ahmad Mustakim Zulkifli terlibat dalam pendedahan akhbar *Kosmo!* mengenai bahaya kilang sisa plastik haram di Kuala Langat.

Wartawan *TVKosmo!* lakukan siasatan bagi lengkapkan dokumentari video

# Bongkar kilang plastik haram

**K**UALA LUMPUR – *TVKosmo!* hari ini meryiarakan dokumentari berjulid *Derrita Racun Import* yang membongkar kegiatan kilang memproses plastik jenis acrylonitrile butadiene styrene (ABS) secara haram di sekitar daerah Kuala Langat, Selangor.

Pengarah projek itu, Muhammad Haikal Abdul Raman berkata, dokumentari tersebut menjalani penggambaran selama dua bulan di sekitar daerah Kuala Langat termasuk Jenjarom, Teluk Panglima Garang dan Banting selain lokasi pemungahan sisa plastik di Pelabuhan Klang.

"Projek dokumentari ini mula dibincangkan pertengahan tahun ini sebelum dua wartawan penyiaran *TVKosmo!* serta dua wartawan daripada Meja Berita pergi membuat tinjauan dan siasatan menyeluruh di daerah

Kuala Langat pada Julai lalu. "Sebelum menjalani penggambaran, kami melakukan pelbagai persediaan termasuk membuat kajian polisi pengharaman sisa plastik oleh kerajaan China, aliran masuk import sisa plastik dari negara-negara Eropah dan Amerika Syarikat ke Malaysia selain syarat pemilihan Lesen Import (AP) sisa plastik kod tarif HS 3915," katanya di sini semalam.

Turut terlibat dalam penggambaran dokumentari berkenaan ialah Ameen Azizul Aziz, Luqman Ridhwan Mohd. Nor dan Ahmad Mustakim Zulkifi.

Menurut Muhammad Haikal, lambakan kilang plastik di daerah tersebut merupakan satu daripada isu yang membelenggu lebih 300,000 penduduk di sana sejak sekian lama.

"Kerjaan khususnya Kementerian Perumahan dan Kerajaan

HAIKAL AMEEN

LUQMAN MUSTAKIM

ANTARA kilang yang diserbu pihak berkuasa ketika operasi bersepadu dijalankan.

Tempatan (KPKT) seharusnya bersikap lebih tegas," ujarnya.

KPKT pada 26 November lalu mengumumkan akan menghentikan pemberian AP sisa plastik oleh kilang-kilang haram tersebut, penduduk daerah Kuala Langat sebelum ini terpaksa berdepan masalah bau busuk gara-gara

pemberian AP kepada syarikat yang layak dan memenuhi syarat kelulusan ditetapkan.

Selain itu pencemaran alam seitar berpunca daripada pembakaran sisa plastik oleh kilang-kilang haram tersebut, penduduk daerah Kuala Langat

pencemaran bau najis babi melalui projek ladang babi moden.

Video dokumentari berdurasi 29 minit itu tersebut boleh diton-ton melalui platform laman web, Facebook dan Instagram *Kosmo! Online*.

Tidak ketinggalan ia turut boleh disaksikan menerusi YouTube *TVKosmo!*.

## Empat kampung di Jelebu dinaiki air setinggi satu meter

Oleh ZULKIFLI MANZOR

**JELEBU** - Sebanyak empat buah kampung di daerah ini dinaiki air setinggi hampir satu meter menyebabkan 178 penduduk daripada 36 keluarga terpaksa dipindahkan ke pusat pemindahan sementara dalam kejadian banjir kilat kelmarin.

Pegawai Pertahanan Awam Daerah Jelebu, Leftenan Md. Marissa Aminuddin berkata, empat kampung terbabit ialah Kampung Geylang, Kampung Melayu, Kampung Tembahthin dan Kampung Baru Pertang.

Menurut beliau, sebanyak 26 keluarga melibatkan 125 orang dari Kampung Geylang dan Kampung Melayu ditempatkan di Sekolah Rendah Kebangsaan (SRK) Geylang yang dibuka pukul 10.36 malam.

"Sebanyak 10 keluarga melibatkan 53 mangsa pula dari Kampung Tembahthin dan Kampung Baru Pertang ditempat-

DAPUR sebuah rumah yang rosak teruk selepas dihempap tanah runtuh di Kampung Pelangai Hilir, Kuala Pilah kelmarin.

kan di Dewan Terbuka Kampung Tambahthin Taman Bukit Pertang yang dibuka pukul 1.16 pagi," katanya dalam satu kenyataan akhbar semalam.

Md. Marissa berkata, mangsa

banjir kilat di Kampung Tembahthin dan Kampung Baru Pertang bagaimanapun telah dibenarkan pulang ke rumah masing-masing selepas air surut pada pukul 1.50 petang semalam.

KEADAAN rumah seorang penduduk Kampung Geylang, Jelebu yang dinaiki air dalam kejadian banjir kilat kelmarin.

Kata beliau, mangsa banjir kilat di Kampung Geylang dan

- KOSMO -

Kampung Melayu masih ditempatkan di SRK Geylang setakat pukul 5 petang semalam kerana air belum surut.

Sementara itu, hujan lebat sejak kelmarin menyebabkan dapur sebuah rumah di Kampung Pelangai Hilir, Kuala Pilah rosak selepas dihempap tanah lereng bukit yang runtuh kira-kira pukul 2 pagi semalam.

Pegawai Operasi Balai Bomba dan Penyelamat Kuala Pilah, Khairul Abd. Aziz ketika dihubungi berkata, jarak antara rumah dan lereng bukit setinggi kira-kira 30 meter itu cuma empat meter.

Bagaimanapun, katanya, tiada kemalangan jiwa berlaku kerana penghuni rumah berkenaan tidak di rumah semasa kejadian itu berlaku.

"Kami tidak membenarkan rumah itu didiami buat masa ini kerana masih berlaku pergerakan tanah pada bukit tersebut," katanya.

## Sisa plastik pertaruh nyawa rakyat, negara

Perbuatan kerajaan masih berdolak-dalik berhubung pemberian lesen import sisa plastik merentaskan kekecuaan pejuang alam sekitar.

**T**ANAH lapang yang terdiri di sebauh ladang kelapa sawit di Sungai Selangor, Kuala Langat, Selangor itu tidak pernah merangsang sesipa, ia dibarkan kosong tanpa apa apa binian atau sekutu.

Namun, sejak setahun lalu, kawasan itu mulai dipenuhi tumpahan sisa plastik. Di lot kelapa sawit itu, terdapat sebuah kilang memproses sisa plastik secara tidak sah ditiridik. Sisa-sisa plastik diluruhnya ditaruh jauh-jauh ribuan tan ke kilang itu untuk dikitar semula. Bahagian plastik yang tidak dikitar semula dibuang ke laut ke kawasan hamparan ini kerana ia membentuk dingding sisa.

plastik setinggi 10 meter. Aktiviti memproses dan mengelakkan plastik di kawasan itu mula mendatangkan kosan kepada penduduk setempat. Bau busuk atau bau tidak sedap malah deria di hutan tersebut selain sapa berhatian dilepaskan ke udara melalui corong-corong kilang.

Kilang plastik itu bersama-sama adalah satu daripada 38 kilang memproses sisa plastik buatan di Kuala Langat. Selain itu, ia merupakan salah satu kilang plastik yang tidak dikitar semula yang dibangunkan di kawasan hamparan ini kerana ia membentuk dingding sisa.

Menurut laporan

**Kemasukan**

Sesudah pembangunan akhir Kosmo!, kerajaan menurusi Komuniti Perumahan dan Kerajaan Tempatan (PKPT) telah mengambil beberapa langkah untuknya membolehkan Lesen Import (LI) bagi sisa plastik yang dilakukan di dalam dan di luar negara selama tiga bulan.

KPT bagaimanapun pengantaran AP tersebut dari kawasan Zon Perdagangan (ZPD) atau kilang berstatus Gutam Pengilangan Berlesen (LMW) pada 16 Ogos.

Akhirnya, yang dilarikan iaitu hasil pertambangan AP tersebut telah membekalkan kilang-kilang berkenaan tidak dapat menggunakan sisa plastik daripada proses pengilangan produk mereka.

Pada 20 Oktober lalu, Menteri KPT, Zuraida Kamaruddin mengumumkan untuk mencegah pengeluaran plastik atau plastik serta merta. Namun, keputusan ini ditarik semula pada 1 November dengan sebabnya ia tidak dibenarkan secara borsyarat.

Jelas KPKT, bagi mengawal kemasukan plastik ke dalam negara, kerajaan turut meredak perletihan medis antarabangsa yang turut turun padang meningkatkan jumlah kawasan sisa plastik di Kuala Langat.

**Pengetahuan**

Sesudah pembangunan akhir Kosmo!, kerajaan menurusi Komuniti Perumahan dan Kerajaan Tempatan (PKPT) telah mengambil beberapa langkah untuknya membolehkan Lesen Import (LI) bagi sisa plastik yang dilakukan di dalam dan di luar negara selama tiga bulan.

KPT bagaimanapun pengantaran AP tersebut dari kawasan Zon Perdagangan (ZPD) atau kilang berstatus Gutam Pengilangan Berlesen (LMW) pada 16 Ogos.

Akhirnya, yang dilarikan iaitu hasil pertambangan AP tersebut telah membekalkan kilang-kilang berkenaan tidak dapat menggunakan sisa plastik daripada proses pengilangan produk mereka.

Pada 20 Oktober lalu, Menteri KPT, Zuraida Kamaruddin mengumumkan untuk mencegah pengeluaran plastik atau plastik serta merta. Namun, keputusan ini ditarik semula pada 1 November dengan sebabnya ia tidak dibenarkan secara borsyarat.

**Salah guna**

Presiden Persekutuan Tan Sri Sakti Nasarwanji, Tan Ching Hin berkata, pada mulanya mereka berusaha sebaiknya mengelakkan kerajaan dari perintah ini kerana ia akan memberi kesulitan kepada perniagaan itu selepas kerajaan mahu mengharamkan tarus AP sisa plastik.

"Namun ini kita berpotret, ia mengumpul minahmat dan bangsi melawan kewujudan kilang-kilang harian ini di sepanjang Kuala Langat yang diberi pulas meningkatkan kemasukan sisa plastik ke dalam negeri."

**KOSMO! ISININ 5 NOVEMBER 2018**

**RENCANA UTAMA**

**INFO** Proses kitar semula sisa plastik

- Sisa plastik dikumpul dari pusat pengumpulan sampah, ia biasanya dimimpin dalam bentuk kubus sebelum dihantar ke kilang kitar semula
- Proses pengasingan sisa plastik dilakukan mengikut kandungan resin dan warna plastik menggunakan mesin khas
- Plastik dipotong menjadi kepingan kecil. Serpihan plastik yang berbeza berat dan saiz dipisahkan menggunakan mesin bagi memastikan plastik berbeza tidak bercampur dalam produk akhir
- Kepingan plastik dibentuk dan disusur bagi melihalkan sisa-sisa pencemaran. Kepingan tersebut akan dilerangkan menggunakan haba sebelum dicuci tanpa merosakkan kepingan
- Proses ini mengeluarkan asap plastik kerana plastik kemudian dimampat kepada bentuk palet seperti manik. Sesetengah rusuh kitar semula pun mungkin dilakukan dalam bentuk gentian seperti loyang. Plastik dalam bentuk ini dihantar kepada syarikat pembuat plastik untuk dijadikan botol, jaket, baju dan sebagainya

Jenis-jenis plastik yang dikitar semula							
Jenis	Polyethylene Terephthalate	High-Density Polyethylene	Polyvinyl Chloride	Low-Density Polyethylene	Polypropylene	Polyesterene	Lain-lain
Contoh	botol minuman bekas makaman pokok	botol cecair cucian jag susu alat permainan	kad kredit pelipis wajar	beg plastik belut gelombang penutup kabel	penutup botol straw fiber karpet	cawan plastik kotak telur penyantik baju	fabrik nilon cakera padat botol bayi
Tahap mudah dikitar semula	mudah	mudah	sangat sukar	boleh diurus	boleh diurus	sukar	sangat sukar
Peratusan daripada sisa plastik global (2015)	11 peratus	14 peratus	lima peratus	20 peratus	19 peratus	enam peratus	24 peratus

# Teknologi insinerator lupus sisa plastik

KAEDAH pembakaran menerusi insinerator merupakan cara paling berkesan untuk melupuskan sisa plastik yang diimport ke Malaysia.

Penyelaras Unit Jaringan dan Industri, Fakulti Pengajian Alam Sekitar Universiti Putra Malaysia, Dr. Mohd. Yusoff Ishak berkata, pembakaran sisa plastik pada suhu tinggi dapat melupuskan bahan tersebut secara total dan meminimumkan kesan terhadap alam sekitar dan pengguna. Bagaimanapun, negara ketika ini tidak mampu menggunakan kaedah tersebut kerana kosnya yang tinggi.

"Kita pernah memiliki fasiliti sedemikian di Pulau Tioman, Pahang namun kos untuk menyelenggarakan amat tinggi. Akhirnya sisa-sisa plastik yang dihantar ke sana semakin banyak dan dibiarkan menimbulkan serta tidak terurus.

"Berbeza pula situasinya di negara-negara lain yang memiliki insinerator berteknologi tinggi seperti Jepun. Mereka mampu membina fasiliti itu di kawasan padat penduduk, malah tidak membahayakan orang

MOHD. YUSOFF

ramai," katanya kepada *Kosmo!* baru-baru ini.

Beliau berkata demikian bagi mengulas laporan *Kosmo!* berhubung kewujudan 35 kilang pelupusan sisa plastik di daerah Kuala Langat dengan hanya tiga daripadanya beroperasi secara sah.

Menurut Mohd. Yusoff, antara pilihan lain yang boleh diamalkan pihak berkuasa adalah dengan menghantar sisa plastik itu ke tapak pelupusan sanitari.

"Menimbun sisa plastik adalah kaedah yang boleh diamalkan kerana kita memiliki tapak tersebut.

"Paling penting, apa yang boleh dilakukan kerajaan ketika ini ialah dengan memantau tahap pelepasan bahan cemar daripada kilang-kilang pelupusan sisa plastik sedia ada dan memastikan mereka mematuhi tahap piawaian kesihatan global," katanya.

Opsyen lain, kata beliau, ialah dengan mengurangkan import sisa plastik ke dalam negara dan menggalakkan budaya kitar semula dalam kalangan orang awam.

## Subsidi elektrik RM40

**Kuala Lumpur:** Belanjawan 2019 membawa berita baik bagi isi rumah yang mempunyai bil elektrik bulanan RM20 ke bawah susulan persetujuan kerajaan meningkatkan kadar subsidi kepada RM40 sebulan.

Menteri Kewangan, Lim Guan Eng, berkata subsidi membabitkan peruntukan RM80 juta itu akan memberi manfaat kepada 185,000 akaun.

“Pada masa ini, kerajaan memberi subsidi kepada semua isi rumah yang mempunyai bil elektrik bulanan RM20 dan ke bawah.

“Selaras hasrat kerajaan melaksanakan subsidi bersasar, penyaluran subsidi ini akan hanya dikhurasukan kepada golongan miskin dan miskin tegar yang berdaftar dengan program e-Kasih.

“Dengan itu, kerajaan mampu meningkatkan kadar subsidi kepada RM40 sebulan dan memanfaatkan 185,000 akaun.

“Ia membabitkan peruntukan RM80 juta,” katanya ketika membentangkan Belanjawan 2019 di Dewan Rakyat, semalam.

KERAJAAN dalam pembentangan Belanjawan 2019 menyediakan Dana Transformasi Pendigitalan Industri sebanyak RM3 bilion bagi merancakkan industri dengan menerapkan teknologi pintar merangkumi penggunaan robot dan AI. - GAMBAR HIASAN

## Malaysia destinasi pelaburan teknologi

Oleh SHAHIZAM TAZALI  
econom@utusan.com.my

■ KUALA LUMPUR 2 NOV.

**I**NISIATIF Revolusi Industri 4.0 terus mendapat perhatian apabila kerajaan memperkenalkan pelbagai langkah untuk memperkasakan teknologi termasuk dana-dana baharu bagi menjadikan Malaysia sebagai destinasi utama pelaburan industri bertenologi tinggi.

Pengarah Urusan dan Ketua Pegawai Eksekutif Standard Chartered Malaysia, Abrar A. Anwar berkata, langkah kerajaan untuk memperkuatkuhan Revolusi Industri 4.0 melalui Dana Berimpak Tinggi membantu memacu kepentingan buatan (AI) dan digitalisasi.

Kata beliau, dua bidang penting itu yang berpotensi besar terutama kepada sektor perkhidmatan kewangan.

"Kedua-dua bidang berkenaan harus dimanfaatkan dengan sebaiknya untuk berinovasi dan meningkatkan pengalaman pelanggan, mengurangkan kos, memperkuatkuhan keselamatan dan mengelakkan penipuan," katanya dalam kenyataan di sini hari ini.

Kerajaan dalam pembentangan Belanjawan 2019 menyediakan Dana Transformasi Pendigitalan Industri sebanyak RM3 bilion bagi merancakkan industri dengan menerapkan teknologi pintar merangkumi penggunaan robot dan AI.

Lembaga Pembangunan Pelaburan Malaysia (MIDA) melalui Dana Berimpak Tinggi akan terus menyediakan geran padanan untuk menggalakkan inisiatif Industri 4.0 seperti pembangunan dan penyelidikan (R&D), penerimaan sijil dan piawaian antarabangsa serta pemodenan kemudahan dan peralatan dengan teknologi terkini.

Sementara itu, Pengarah Urusan Trend Micro Malaysia, Goh Chee Hoh berkata, peruntukan yang diberikan bagi menyokong pertumbuhan Industri 4.0 berikaitan teknologi membawa kepada peningkatan produktiviti dan daya saing perniagaan di Malaysia.

Menurutnya, dalam usaha melaksanakan transformasi digital keselamatan siber merupakan komponen penting yang membolehkan inovasi dilakukan.

"Selain daripada risiko biasa dalam perniagaan mereka perlu mengelakkkan ancaman siber yang menyasarkan infrastruktur penting. Kami menggesa pemain industri untuk melihat keselamatan siber sebagai nilai yang berpotensi potensi melalui digitalisasi," katanya.

Dalam pada itu, Pengurus Negara Malaysia dan Brunei Net-App, Azrin Abd. Shukor berkata, pengenalan Dana Transformasi Pendigitalan Industri dan Dana Berimpak Tinggi sebagai tepat pada masanya untuk penggunaan analitik data besar, AI dan pembelajaran mesin berkembang dengan meluas dalam ekosistem perniagaan di Malaysia.

## PKS, Industri 4.0 bantu Malaysia maju

**KUALA LUMPUR 2 Nov.** – Penerusan terhadap Industri 4.0 terutamanya bagi perusahaan kecil dan sederhana (PKS) dalam Belanjawan 2019 terutamanya dalam penggunaan teknologi yang lebih luas seperti Internet Segala-galanya (IoT), perkhidmatan digital dan automasi dapat membantu mempercepatkan Malaysia menjadi sebuah negara digital setaraf dengan negara maju yang lain.

Naib Presiden Penyelidikan Gartner, Tervinderjit Singh berkata, peruntukan sebanyak RM210 juta bagi membantu menggalakkan peralihan kepada Industri 4.0 di bawah program *Readiness Assessment* memperkuatkan lagi komit-

men kerajaan untuk meningkatkan tenaga kerja dan memacu perjalanan digital Malaysia.

“Belanjawan 2019 adalah bukti komitmen kerajaan baharu untuk mempercepatkan penggunaan Industri 4.0 di Malaysia dalam kalangan perniagaan.

“Gartner yakin dengan inisiatif yang diumumkan dalam Belanjawan 2019, Malaysia terus berada di landasan yang betul untuk menjadi sebuah ekonomi digital digitisasi sepenuhnya.

Belanjawan 2019 bertemakan

TERVINDERJIT SINGH

*Malaysia Wibawa, Ekonomi Dinamik, Rakyat Sejahtera* menggariskan tiga teras utama iaitu melaksanakan reformasi institusi; memastikan kesejahteraan rakyat dan memupuk budaya negara keusahawanan.

Sementara itu Perbadanan Pembangunan Perdagangan Luar Malaysia (Matrade) berpendapat, Bajet 2019 memberikan tumpuan yang kuat ke atas pembinaan keupayaan untuk PKS Malaysia dan syarikat pertengahan, khususnya perniagaan milik wanita dan helia.

**8 NEWS**

# DRIVEN BY 3 THRUSTS

**FOCUS ONE** TO IMPLEMENT INSTITUTIONAL REFORMS

**STRATEGY 1: STRENGTHENING FISCAL ADMINISTRATION**

- **Implementing zero-based budgeting exercise for this financial year.**
- **Fiscal Responsibility Act will be tabled by 2021 to avoid recklessness.**
- **Government Procurement Act to be tabled next year to govern procurement process on current cash basis or accounting that should be converted to accrual basis by 2021.**

**STRATEGY 2: RESTRUCTURING AND RATIONALISING GOVERNMENT DEBT**

- **Committed to maintain a path of fiscal consolidation to reduce a deficit of 3.4 per cent in 2019 to 3.0 per cent in 2020 and 2.9 per cent in 2021.**
- **The government's expense is expected to be reduced further to 2 per cent.**
- **To ensure a successful fiscal consolidation exercise to address Malaysia's RM1 trillion debt, the government will reduce debt percentage in GDP by:**
  1. Setting up Debt Management Office;
  2. Cancelling the RM15 billion Multi-Product Pipeline and Trans-Sabah Pipeline, RM10 billion on the construction of the second stage of the RM8 billion East Coast Rail Link construction and RM110 billion KL-Singapore High Speed Rail;
  3. Take necessary actions to recover funds lost and stolen from 1MDB case.

**STRATEGY 3: RAISING GOVERNMENT REVENUE**

- **Leveraging Assets: Leverage on government assets and review tax incentives.**
- **Seek to recruit talents in non-core areas at non-strategic companies and para down tasks.**
- **Implementing Public-Private Partnership (PPP) model for public projects based on land swap transactions via open tenders.**
- **Scheduled and staggered land sales via auction to higher bids.**
- **Set up the world's first "Airport Real Estate Investment Trust" (REIT) to raise RM4 billion.**
- **REIT will have 30 per cent stake of the REIT to private investing institutions — Number of special draws will be reduced by half.**

**Reviewing Taxation:**

- **Starting Jan 1, grant exemptions will be given for specific business-to-business Service Tax for registered Service Tax entities.**
- **Change system for Sales Tax deduction will start Jan 1 to used products faced by small manufacturers that purchase products from importers.**

**Tax Reform Committee's proposal:**

- **Imported services such as architecture, graphic design, information technology and engineering design will be subjected to Service Tax.**
- **Customs duty to be imposed on enforcement against cigarette smuggling to recover RM1 billion in tax losses.**
- **Imported departure levy for all air-bound travellers by air starting Jan 1 next year at RM20 per person.**
- **Stamp duty on transportation to Asian countries and RM40 to countries other than Asian.**
- **Stamp duty on transportation of vehicles with a value of more than RM1,000,000 will increase from 3 per cent to 4 per cent.**
- **Stamp duty for wholesale money market fund will cease beginning Jan 1 next year.**
- **Taxes, fees and levy on the Gaming Industry will be increased:**
  - a. **Casino Licence to be increased from RM120 million to RM150 million per annum;**
  - b. **Cost of licence to be increased up to RM100 million per annum;**
  - c. **Maching liability to be increased from RM 0.100 to RM0.100 per annum;**
  - d. **Gaming machine dues to be increased from 20 per cent to 30 per cent on gross collection.**
- **Number of special draws will be reduced by half.**

**FOCUS TWO** TO ENSURE THE SOCIO-ECONOMIC WELLBEING OF MALAYSIANS

**ENSURING WELFARE AND QUALITY OF LIFE**

- **Bantuan Sosia Hidup financial assistance to 4.1 million households worth RM5 billion.**
- **RM1,400 to households earning monthly income of RM2,000 and below.**
- **RM700 to households earning monthly income between RM2,001 and RM3,000.**
- **RM650 for households earning RM3,001 to RM4,000.**
- **Financial assistance will be up to RM1,000 for households aged 60 and disabled (age limit) to receive an additional RM120 per child-up-to a maximum of four children.**
- **Government to contribute RM100 a month for easy accounts with the Bank Negara for holders of at least RM5 under EPF+ SURA contribution scheme for housewives under EPF+ SURA contribution scheme.**
- **Fuel subsidy for vehicles with engine capacity of 1,500cc and below will be increased to RM100 per month up to RM195 per month.**
- **Petrol subsidy for vehicles with engine capacity of 1,500cc and above will be RM100 per month with a subsidy of at least RM1.33 per litre, depending on the marked price of petrol. Non-subsidised vehicles to pay fuel prices based on Automatic Price Mechanism (APM).**
- **Domestic flight tickets for 1kg luggage, pre-cooked sugar and cooking oil in 1kg packs, local rice with 15 per cent broken grains in 10kg packs, and for RON95 petrol, diesel and liquefied petroleum gas in Sabah and Sarawak will be subsidised.**
- **RM20 million to enforce the Price Catcher mobile application to help the authorities monitor against unlawful pricing practices.**
- **Poor and hardworking households will be assigned with slots to qualify for low cost of electricity at 40 cents per unit of kWh and less.**
- **RM10 million for NGOs and social enterprises to uplift the underprivileged and marginalised communities.**

**ENHANCING EMPLOYMENT AND EMPLOYABILITY**

- **RM20 million in matching grants to carry out "Apprenticeship" and "Graduate Enhancement Programme for Employability" under UNERATRA for students aged 18 to 24 years.**
- **Employment of foreign workers to be cut to four per cent from the current six per cent effective Jan 1, 2019 for employees between 61-65 years old.**
- **Up to 100 tax-free allowances for companies who employ ex-convicts.**
- **Up to a maximum salary of RM4,000 each.**
- **One-off RM1000 assistance to qualified government pensioners.**
- **RM10 million per annum for healthcare services for parents of children aged 0-18 years old.**
- **Seven days of unrecruited leave for non-Muslims for the purposes of performing their religious pilgrimage and functions.**
- **Minimum wage to be raised to RM1,100 per month starting Jan 1, 2019.**

**ENHANCING HEALTH & SOCIAL WELFARE PROTECTION**

- **National B40 Fund to provide free medical treatment for four critical illness for children aged 0 to 14 years up to 14 days per year, covering RM100 per day. Policy to start Jan 1.**
- **Great Eastern Life Insurance to contribute the initial RM100 million.**
- **Waive stamp duty for all Tengang Insurans products for two years beginning 1 January 2019.**
- **Tax deduction of up to RM7,000 to civil servants under the pension scheme.**
- **Stamp duty on tobacco excise duty at 40 sen per litre on two categories of sugary drinks, starting April 1, 2019.**
- **Expand number of locations where smoking will be disallowed starting Jan 1, 2019 to achieve the goal of "Smoke-Free Malaysi" by 2045.**

**FOCUS THREE** TO FOSTER AN ENTREPRENEURIAL ECONOMY

**EMBRACE THE DIGITAL ECONOMY**

- **RM2 billion in funds allocated by Government-Linked Investment Funds to co-invest with the private equity and venture capital funds to focus on strategic sectors including the digital economy.**
- **RM650 million to set up a Co-Investment Fund (CIF) to invest alongside private investors via a alternative financing platform via Equity Crowdfunding in Peninsular Malaysia.**
- **New regulatory framework to approve and monitor Digital Coin and Token Exchanges.**
- **RM1 billion allocated to the MyDigital Initiative (MDI) with an allocation of RM33 million.**
- **RM1 billion to launch the Future Connectors Project to allow new broadband installation in the targeted 30 Mbps speed in rural and remote areas of the country within 5 years.**
- **Enforced the Ministry Standards for Access Pricing (MSAP) which will result in fixed broadband prices to be reduced by at least 50 per cent by the end of 2018.**

**ACCELERATING ADOPTION OF INDUSTRY 4.0**

- **RM160 million allocated from 2019 to 2021 to support the transition and migration to Industry 4.0.**
- **500 small medium enterprises (SMEs) under the Research Assessment programme will be assisted by the Ministry of Science, Technology and Innovation (MSTI) to develop their intellectual property including 2,100 scientific equipment to enable greater collaboration between public and private sector.**
- **RM2 billion under Bank Negara Malaysia (BNM) to support the digital transformation of SMEs to invest in automation and modernisation.**
- **RM100 million allocated to the Industrial Transformation Fund with a sub-disbursed interest rate of 2 per cent.**
- **Bank Pembangunan Malaysia Bhd (BPM) to drive e-government, robotics and artificial intelligence industries.**

**LUBRICATING THE LOGISTICS AND TRANSPORTATION SECTORS**

- **RM2.44 billion to upgrade and restore railway tracks.**
- **RM25 million to develop a truck depot aimed at catalysing development of Kota Perdana Industrial Estate in Klang.**
- **15ha land in Putrajaya to be turned into Free Trade Zone to support shipping and logistics at Port Klang Free Zone.**
- **RM100 million to assist smallholders to obtain the Malaysian Sustainable Palm Oil (MSPO) certification.**
- **RM100 million for the use of Upgrained Modified Bitumen (CMB) to build roads at ports and industrial areas in stages.**
- **RM100 million to reduce production incentive to assist the easing of the fall in rubber prices for smallholders (supplement income from the fund when rubber prices fall below RM2.26 per kg).**

**STRENGTHENING SMALL, MEDIUM ENTERPRISES (SMEs)**

- **RM4.2 billion SME Lien Fund including RM1 billion for Bumiputera SMEs.**
- **Corporate income tax rate for taxable income of up to RM50,000 and RM8 with less than RM2.5 million in paid up capital will be reduced from 18 per cent to 17 per cent.**
- **RM100 million allocated to enhance the capability of the SMEs in halal industry.**
- **RM1 billion SME Syariah Compliant Financing Scheme via Islamic financial institutions with a subsidy of 2 per cent profit rate.**
- **RM100 million allocated to the Halal Sector to provide RM200 million for the wholesale and retail industry.**
- **RM100 million allocated to TEKUN to finance small entrepreneurs.**
- **RM20 million to initiate the "Malaysia First" campaign to support local products and services.**

**AGRICULTURAL SECTOR**

- **RM47 million for R&D of seeds, grains and fruits.**
- **RM62 million to implement agricultural and agrobase industry and entrepreneurship training for youths.**

**ENSURING BALANCED DEVELOPMENT**

- **RM926 million to build and upgrade roads and bridges.**
- **RM400 million and RM738 million allocated to supply electricity and water respectively to rural and remote areas.**
- **RM100 million allocated for Villages to upgrade and maintain basic infrastructure.**
- **RM100 million allocation to support the Indian community, including technical and skills training to improve their productivity.**
- **RM100 million for the construction and upgrading of infrastructure for the supply of water, education, health, welfare and economic development in rural and semi-urban communities.**
- **RM20 million for readers associations registered with the Registrar of Societies to carry out community, security and neighbourhood activities.**

**LAMPIRAN 11**  
**NEW STRAITS TIMES (LETTERS): MUKA SURAT 16**  
**TARIKH: 3 NOVEMBER 2018 (SABTU)**

SAVING THE ENVIRONMENT

## Green banking initiative to ease global warming

**EARTH** is currently facing a host of environmental concerns. These problems arise from climate change, global warming and pollution — all of which have a significant impact on biodiversity, forestry, agriculture, water resources, and human health.

These environmental issues are also global; environmentalists, nature lovers, and the general public agree that we need to put a stop to such problems which are mainly man-made.

We need an eco-friendly policy to help us deal with such adverse effects which put pressure on industries and services.

Green initiatives are seriously needed to promote sustainable development and environmental protection.

In Malaysia, air and water pollution are expected to become more challenging as a result of rapid economic growth over the past two decades.

Rapid urbanisation and industrial growth have contributed to the increase in air pollution. The sources of air pollution are from the transportation and industrial sectors through the burning of fossil fuels.

The growing number of vehicles remains the main cause of

the air quality deterioration, particularly in cities.

Therefore, the quality of air and water directly affects the socio-economic condition of the society.

Banks, as financial institutions can play a role in promoting green initiatives and sustainable economic growth through "green banking" practices.

The concept is a strategic approach to healthier marketing demands in modern business areas.

Green banking is any form of banking that benefits the environment. According to the Indian

Banks Association (IBA, 2014): "Green Bank is like a normal bank, which considers all the social and environmental/ecological factors with an aim to protect the environment and conserve natural resources".

It is also known as the "ethical" or "sustainable" bank. Its purpose is to perform "banking activities but with an additional plan towards taking care of earth's ecology, environment, and natural resources including biodiversity".

Green banking is gaining traction — it is making technological and operational improvements

by changing clients' habits in banking. Paperless banking, for example, reduces cost, and helps in environmental sustainability — it reduces the use of paper, power and energy.

Green banking is about making the society habitable and stopping environmental degradation.

Green banking is a smart and proactive way of thinking with a vision about future sustainability.

**Inovasi teknologi bolehkan perniagaan lebih maju, cekap**

Inovasi teknologi yang semakin canggih mentransformasikan dunia kepada kepentasan seterusnya membolehkan perniagaan menjadi lebih maju dan cekap.

Pendigitalan boleh berfungsi sebagai distruktif dan memboleh daya perniagaan kerana dengan teknologi digital seperti analisis data raya (BDA), kecerdasan buatan (AI), Internet untuk segala-galanya (IoT) dan pengkomputeran awan membantu perniagaan dan individu dalam meningkatkan keupayaan.

Teknologi distruktif juga menggandakan pertumbuhan dalam ekonomi digital dan mengoptimumkan pelaburan digital, di mana

ia menyaksikan banyak firma mendapat manfaat daripada kemajuan digital dalam menambah baik operasi serta model perniagaan.

Syarikat perisian pula semakin bertambah dengan memanfaatkan kemajuan teknologi digital untuk membangunkan aplikasi bagi kilang pintar, kamera pintar, pengangkutan, rumah pintar dan perniagaan dalam talian.

Sebagai contoh, kilang pintar, di mana konsep pembuatan baru yang menggunakan pelbagai aplikasi perisian mengubah data operasi kepada maklumat perniagaan seterusnya membolehkan firma meningkatkan daya saing.

## Tidak kompromi isu alam sekitar

Oleh ZULKIFLI SAINUDDIN  
pengarang@utusan.com.my

■ SHAH ALAM 2 NOV.

**K**ERAJAAN negeri tidak akan berkompromi dengan isu alam sekitar bagi memastikan rakyat dapat hidup dalam persekitaran yang kondusif, selamat dan sejahtera. Menteri Besar, Amirudin Shari berkata, sikap mengabaikan alam sekitar bagi memberi laulan kepada pembangunan yang dirancang atas alasan memajukan sesuatu kawasan

tidak boleh diterima sama sekali.

"Alam sekitar diceroboh dengan rakus hingga menyebabkan kejadian meragut nyawa seperti tanah runtuh, banjir atau pun kebakaran hutan.

"Namun, saya berbangga dengan ketegasan kerajaan negeri yang tidak berkompromi dengan isu alam sekitar," katanya dalam majlis sambutan Hari Perancangan Bandar Sedunia Peringkat Selangor di sini.

Sultan Selangor, Sultan Sharafuddin Idris Shah turut berkenan mencemar duli men-

yempurnakan sambutan itu.

Turut berangkat mengiringi baginda, Tengku Permaisuri Selangor, Tengku Permaisuri Norashikin.

Hadir sama Pengurus Jawatankuasa Tetap Perumahan dan Kehidupan Bandar, Haniza Mohamed Talha serta Pengarah Jabatan Perancangan Bandar dan Desa Selangor, Muhammad Ridzuan Arshad.

Amirudin memberitahu, Selangor telah melaksanakan Kerangka Kerja Bandar Rendah Karbon (LCCF) bagi membantu mengurangkan pencemaran

serta mengekalkan kelestarian alam sekitar.

"Daripada 12 pihak berkuasa tempatan (PBT) di Selangor, tujuh daripadanya telah melaksanakan inisiatif LCCF sepenuhnya dan saya harap baki lima lagi PBT dapat berbuat demikian," ujarnya.

Sementara itu, Muhammad Ridzuan berkata, kerajaan negeri juga mempunyai satu jawatankuasa khas untuk memantau pembangunan di kawasan lereng bukit bagi mengelak kejadian tanah runtuh dan ha-kisan.

"Setiap pembangunan di lereng bukit perlu mendapat kelulusan daripada Jawatankuasa Kawasan Sensitif Alam Sekitar Negeri Selangor terlebih dahulu sebelum membuat permohonan kebenaran merancang daripada PBT.

"Jawatankuasa yang dipengerusi oleh saya sendiri dan turut disertai Jabatan Kerja Raya, Institut Kerja raya Malaysia (Ikram) dan agensi berkaitan yang lain ini bertujuan menilai semua aspek teknikal secara profesional bagi setiap permohonan yang dibuat," jelasnya.

# Accelerating adoption of Industry 4.0

Govt sets aside RM5bil to help

**PETALING JAYA:** Businesses may have more reasons to embrace the Industry 4.0 age as the government has set aside over RM5bil to help them do so.

In tabling the 2019 National Budget, Finance Minister Lim Guan Eng said the government aimed to support measures to accelerate the adoption of Industry 4.0 as outlined in the Industry 4.0 Blueprint or Industry4WRD, which aims to make Malaysia the prime destination for high-tech industries.

Industry 4.0 is the term used to describe the current trend of automation and data exchange in manufacturing technologies.

Among the measures include the Malaysian Productivity Corporation conducting a readiness assessment programme to help about 500 small and medium-sized enterprises to make the change.

The government also plans to develop the Knowledge Research for Science and Technology Excellence (KRSTE.my) to boost the sharing of research and development resources between the private sector and academia.

"By 2019, the government aims to open up access to 250 facilities and 1,200 scientific and research data to the private sector," he said.

Additionally, he said the government would also bear the cost of placing 100 researchers into the private sector under a researchers placement programme.

The government will also set up the RM3bil Industry Digitalisation Transformation Fund to encourage industries to utilise artificial intelligence.

To further sweeten the deal and speed up adoption, companies making an effort to embrace Industry 4.0 could also enjoy double tax deduction.

This is applicable if they offer scholarships to students studying engineering and technology whether at the technical and vocational, diploma or degree levels, participate in the Dual-National Training Scheme for Industry 4.0 recognised by the Human Resources Ministry or Mida (Malaysian Investment Development Authority), or conduct relevant training programmes approved by the Human Resources Ministry.

<b>BUDGET 2019</b>	
<b>SME</b>	
<b>RM5bil</b>	
■ RM210mil allocated over three years	support the transition and migration to Industry 4.0
■ RM2mil to set up the Knowledge Resource for Science and Technology Excellence	to enable better collaboration between academia and private sector
■ RM2bil allocated under the Business Loan Guarantee Scheme to encourage small and medium-sized industries to invest in automation and modernisation processes	
■ A RM3bil industry digitalisation transformation fund with an interest rate of 2% will be created under Bank Pembangunan Malaysia Bhd to accelerate the adoption of smart technology	
■ MIDA will continue to provide matching grants through its High Impact Fund with a specific emphasis of Industry 4.0 initiatives	
■ Khazanah Nasional Bhd to develop an aerospace hub on an 80-acre piece of land in Subang	
■ Double tax deduction for companies that carry out programmes to boost the adoption of Industry 4.0	

Gartner Research vice-president TJ Singh said such incentives would contribute to a wider adoption of technologies such as the Internet of Things, digital and automation services and accelerate Malaysia's growth into a digital nation.

He said the readiness assessment programme reinforced the government's commitment to upskilling the workforce and driving Malaysia's digital journey.

Chief Information Officers list the lack of talent and skill shortage as one of the main barriers to digital transformation.

"We believe this initiative is a step in the right direction towards overcoming that barrier," he said.

# N. Korea warns of return to nuclear policy

**SEOUL** — North Korea has warned the US it will “seriously” consider returning to a state policy aimed at building nuclear weapons if Washington does not end tough economic sanctions against the impoverished regime.

For years, the North had pursued a “byungjin” policy of simultaneously developing its nuclear capabilities alongside the economy.

In April, citing a “fresh climate of detente and peace” on the peninsula, North Korean leader Kim Jong-un declared the nuclear quest complete and said his country would focus on “socialist economic construction”.

But a statement issued by the North’s foreign ministry said Pyongyang could revert to its former policy if the US did not change its stance over sanctions.

“The word ‘byungjin’ may appear again and the change of the line could be seriously reconsidered,” said the statement carried by the official KCNA news agency late on Friday.

At a historic summit in Singapore in

June, US President Donald Trump and Kim signed a vaguely-worded statement on denuclearisation.

But little progress has been made since then, with Washington pushing to maintain sanctions against the North until its “final, fully verified denuclearisation” and Pyongyang condemning US demands as “gangster-like”.

“The improvement of relations and sanctions are incompatible,” said the statement, released under the name of the director of the foreign ministry’s Institute for American Studies.

“What remains to be done is the US corresponding reply,” it added.

The statement is the latest sign of Pyongyang’s increasing frustration with Washington.

Last month, the North’s state media carried a near 1,700 words long commentary accusing the US of playing a “double game”, implicitly criticising Trump for his comments aimed at barring Seoul from lifting sanctions

against Pyongyang.

Despite a flurry of diplomacy on and around the peninsula differences are emerging between Seoul and Washington, which stations 28,500 troops in the South to protect it from its nuclear-armed neighbour.

The South’s doveish president Moon Jae-in has long favoured engagement with the North, which is subject to multiple UN Security Council sanctions over its nuclear and ballistic missile programmes.

He has dangled large investment and joint cross-border projects as incentives for steps towards denuclearisation, while the US has been adamant pressure should be maintained on Pyongyang until it fully dismantles its weapons programmes.

In an interview with Fox News on Friday, US Secretary of State Mike Pompeo reiterated that sanctions will remain until Pyongyang carries out its denuclearisation commitments made in Singapore, adding he will meet with his North Korean counterpart next week. — AFP

## NEW GLOBAL DEAL FOR NATURE

The world needs to urgently transition to a net carbon neutral society, to halt and reverse nature loss

**T**HE World Wide Fund for Nature (WWF) last week released its 2018 Living Planet Index and the picture is grim.

Since 1970, there has been a 60 per cent decline in earth's wildlife populations — the stark consequence of pressures humans have imposed on all other living things in our 200,000 years of existence — a tiny blip in the 4.5 billion-year history of our planet.

Imaging the shoe on the other foot: 60 per cent of humanity — the population of Asia — wiped off the planet.

People the world over are cutting down forests, withdrawing too much water from rivers, choking oceans with plastic and other pollutants, and pushing many animals to extinction by destroying their habitat.

For the sake of both people and wildlife, now and in the future, we need a healthy planet, with a rich variety of plants and animals and vibrant ecosystems.

Thankfully, there are growing calls for a new global deal for nature, backed by concrete commitments from global leaders and businesses, communities and individuals to tackle wildlife loss, climate change and development in an integrated way.

We urgently need real change, all over the world.

With that in mind, the global community will meet this month to open negotiations on a new action framework on biodiversity. In collaboration with the government of Egypt, the UN Convention on Biological Diversity (CBD) will hold its 14th meeting of the Conference of the Parties in Sharm el Sheikh.

The event will feature a High-Level Segment (Nov 14 and 15), at which up to 80 ministers of environment, infrastructure, energy, industry and other sectors will discuss mainstreaming biodiversity protections into their respective fields of work.

Following that, the 196 Parties to the CBD will meet for 12 days of

*We need a healthy planet, with a rich variety of plants and animals and vibrant ecosystems.* REUTERS PIC

talks on last-minute efforts to reach the world's Aichi Biodiversity Targets (2010-2020), mainstreaming biodiversity issues, and to begin two years of negotiation on a post-2020 global action framework for biodiversity, scheduled for final agreement at COP15 in China.

Commenting on the WWF report, Sir Robert Watson, my friend and successor as Chair of the IPBES — often called the IPCC for biodiversity, and the source of several recent authoritative and influential assessment reports to inform the world's coming negotiations — stressed that "nature contributes to human wellbeing culturally and spiritually, as well as through the critical production of food, clean water, and energy, and through regulating the earth's climate, pollution, pollution and floods."

The Living Planet report clearly demonstrates that human activities are destroying nature at an unacceptable rate, threatening the wellbeing of current and future generations".

Said WWF International Director General Marco Lambertini: "The nature conservation agenda is not only about securing the future of tigers, pandas, whales and all the amazing diversity of life we love and cherish on earth. It's bigger than that.

"Our day-to-day life, health and livelihoods depend on a healthy planet.

"There cannot be a healthy, happy and prosperous future for people on a planet with a destabilised climate, depleted oceans and rivers, degraded land and empty forests, all stripped of biodiversity, the web of life that sustains us all."

"In the next years, we need to urgently transition to a net carbon neutral society and halt and reverse nature loss, through green finance and shifting to clean energy and environmentally friendly food production. In addition, we must preserve and restore enough land and ocean in a natural state to sustain all life."

The WWF report underscores dramatically the need to put more rigour into our efforts. And, as noted, the government is only one of the partners in this global endeavour.

There is also a role for civil society and the corporate sector.

As part of their response, it has been encouraging to note the initiative of the AEON Environmental Foundation and the Secretariat of the CBD establishing the MIDORI Biodiversity Prize in 2010 "to honour three individuals on a biannual basis who have made outstanding contributions to conservation and sustainable

use at local and global levels, and who have influenced and strengthened various biodiversity-related efforts, as well as raised awareness about biodiversity".

Takuya Okada, chairman of the AEON Environmental Foundation and honorary chairman of AEON Co Ltd, said: "Safeguarding the earth's biodiversity and tackling climate change are two of the greatest challenges of our time. We hope that the MIDORI Prize will help to inspire action to meet the global challenge, the Aichi Biodiversity Targets, and the objectives of the United Nations Decade on Biodiversity 2011-2020."

CBD executive secretary Christiana Paëa Palmer said: "The MIDORI Prize is a unique international prize focused on biodiversity, shining a spotlight on the work of dedicated individuals. We hope it will contribute to raising public awareness on the essential role of biodiversity to human wellbeing and the solutions that biodiversity provides to global challenges like climate change."

The writer was the founding chair of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES), and a recipient of the 2018 MIDORI Biodiversity Prize.

**Thankfully, there are growing calls for a new global deal for nature, backed by concrete commitments from global leaders and businesses, communities and individuals to tackle wildlife loss, climate change and development in an integrated way.**

### TARIKH: 5 NOVEMBER 2018 (ISNIN)

Debi Huffman with a life-sized picture of astronaut Eric Boe at the Fernbank Science Center in Decatur, Georgia. — Photos: Tribune News Service

## Launchpad for

**Eric Boe, who has been tapped to fly on Boeing's first crewed flight to the International Space Station, has a connection to Atlanta.**

A YOUNG Eric Boe, not even five years old, was awestruck while watching grainy black-and-white video recordings of two American astronauts in bulky spacesuits bounces bouncy around one celestial body.

The boy was very, very excited. It was captivating for Boe and millions of others gathering around their black-and-white televisions on July 20, 1969.

As Boe saw the moon landing from his home town in Atlanta, he felt an indelible connection to the historic moment.

Here were Neil Armstrong and Edwin "Buzz" Aldrin walking on the moon — the same moon Boe looked at from his bedroom window at night, the same moon he saw shining in the dark sky during evening walks with his family in the North Georgia neighborhood of Duluth County.

"It was a real dream moment," said Boe. "It's amazing to look at something in the sky that seems so far away, and then you can actually reach out and touch it."

As the years went by in school, college and Air Force, Boe's affinity for and connection to space strengthened. When he turned 20, Boe was selected by NASA to be an astronaut. Since then, he has piloted two space shuttles. And now, Boe, 54, is one of the astronauts chosen to fly on Boeing's first spacecraft and to among the first American astronauts to launch from US soil since 2011.

The voyages are scheduled to begin next year. Boe, who has been invited to fly on Boeing's Starliner, is part of an elite group of astronauts NASA hopes will usher in a new era of space travel.

With his wife Debi Huffman, he continues to maintain strong ties to Atlanta and has a soft spot for his hometown. Atlanta is also the place where family, friends and teachers helped his galactic dreams come true.

**A determined student**

When Boe was about 12 years old, he enrolled in a Discovery aerospace class at the Fernbank Science Center. It was a perfect class for a bright child who loved math and science. He had rocket model and space-themed aerospace history books on field trips to Bobbin Air Force Base in Marietta. He loved all of it — everything from looking through telescopes to building rockets and flying rockets from Piedmont Park.

And Boe credits his teacher, Debi Huffman, for helping nurture his enthusiasm for aerospace.

"Absolutely one of the things I talk about when I talk to students

is how impressed he is by teachers who work a lot of time with kids and are very dedicated," said Boe.

In class, Boe told Huffman of his dream of one day becoming an astronaut. He promised to have her sign his guest book at his first space mission.

Meanwhile, Huffman, who still works at the Fernbank Science Center, remembers Boe as a hard-working and determined student. He also gave careful attention to details, even as a middle-schooler.

In class, students built rockets out of kits, and learned to attach fins and projectiles to modify their designs, a right Huffman said.

Sometimes, the fins fell off, and students needed to reattach them. But Boe never did it perfectly the first time.

Huffman said Boe's determination as a young student paid off.

"Everything he did as a student was something that set him apart in his class," Huffman said. "He's a fabulous role model for students I teach because I can see in his footsteps and use those to encourage kids."

Boe's years was also influenced by his parents. His father was a pilot in the Air Force and flew for Eastern Airlines. And his mother often took him to the library to research projects, not only libraries in the home but also the science library, including the one at Georgia Tech.

**From Iraq to NASA**

In high school, Boe continued to excel in school and loved learning. His favorite subjects included science, Spanish and math classes — especially calculus.

"It's something concrete that I could put my hands around, and there was an answer," he said.

Boe became a pilot in the Air Georgia Wing of the Civil Air Patrol, flying the covered Gen. Carl A. Spaatz Award. Boe graduated from Henderson High School (which is now a middle school) in Duluth, Georgia, in 1985. On graduation, Thomas Hovey "Tom" Marsburn, graduated from Hensley High School in 1978.

Then, Boe entered the Air Force Academy. After graduating from the Air Force Academy, he became a test pilot. He also flew 55 combat

missions over Iraq in support of Operation Southern Watch. Before his military retirement in 2012, he logged approximately 6,000 flight hours in that period.

Boe's wife is married and has two children, said he always wanted to be a pilot, and "in the back of my mind, I thought about being an astronaut." But he never knew the odds — with tens of thousands of applicants seeking only a handful of coveted spots.

"I knew becoming an astronaut would take a lot of time and bring me to the place at the right time, so my first goal was being a pilot, and a test pilot, because I knew by doing that, you could open up some of the gates for Boe, an unknown, untrained man."

Boe received his master's degree in electrical engineering from Georgia Tech in 1997.

In 2000, Boe's lifelong journey of maybe — just maybe — becoming an astronaut came to fruition. He was 35 years old.

**Previous trips to space station**

Huffman stood by with white knuckles at Cape Canaveral, Florida, as the space shuttle Endeavour made its way into the evening sky on Nov. 14, 2008.

Huffman's presence was a promise made good by Boe. Boe packed a special Fernbank flag for the first shuttle mission, a gift to the shuttle program, but also the science centre that means so much to him and his career as an astronaut.

Boe piloted the STS-129 Endeavour, a mission that expanded the living quarters of the International Space Station to eventually house six crew members by delivering a new bathroom, kitchen, two sleeping quarters and a water recycling system. He also served as the pilot for STS-133 Discovery. This mission delivered the Permanent Multipurpose Module (PMM) and the fourth Express Logistics Carrier (ELC) to the International Space Station, a research laboratory that orbits around Earth.

The space station is a unique science laboratory for human health, biological and materials research, as well as a technology test bed. The space station is also considered

## dreams

g's Starliner, is part of an elite group of space travel.

a steppingstone for going farther into the solar system.

It has the volume of a five-bedroom house or two Boeing 747 jetliners. It can support a crew of six people, plus visitors.

And it's a destination of wondrousness; it's the view of his homeland from space that really made an impact on Boe.

"No words can describe how amazing it is to see the Earth," he said. "You can tell the planet is alive. You can see the colors — the greens and blues. It's big and small at the same time."

The construction of the International Space Station was begun in 1998. It was seen as a new age of cooperative space exploration — an alliance between a number of countries, but especially longtime rivals the United States and Russia.

And since the retirement of the space shuttle fleet in 2011, Boeing has relied almost exclusively on Russian rockets and capsules to transport crew and supplies to and from the space station.

While the tenor of Russian-American relations has changed, in space, the two countries remain close.

"We train together; we work together," Boe said. "We go to space together; we eat well when you work with them day in and day out for years."

Boe studied Russian at the Air Force Academy, which has been quite useful — although not the way he initially envisioned.

"I studied Russian because it was during the Cold War, and I wanted to learn the enemy," said Boe. "I am still learning Russian, but we are working together, and I am using Russian in a constructive way to make the world a better place."

In that same vein, he said something else you don't see from space are borders.

"You don't have these conventional borders, and you realize we are all in this life together — planet Earth and humanity as a whole," Boe said.

Ultimately, he said, you see the connectedness of Earth and it gives you an appreciation for life in general."

Boe said Georgia state is on his short list of places to photograph from the sky, along with Mount

Everest and New Zealand. On Nov. 20, 2008, he flew over Bobby Dodd Stadium when Georgia Tech was playing a football game.

After returning to Earth on Endeavour, Boe attended a flag ceremony at the Atlanta airport.

Boe, who spent a total of nearly 29 days in space, said as he reflects on his time traveling in space, he's coming to realize the time in orbit is just a small part of an astronaut's journey.

"Space flight is about people. For me, a lot of the fun is traveling and getting to know the people and work with the other. There are 500 to 1,000 people supporting us, training us, meeting, making our equipment. There are a lot of people who make our job easier," he said.

And when he's in space, he said, "You are very busy. But every once in a while, you take a breath, and marvel at the experience — and view of the space."

"I tell young people that there are a lot of cool jobs," he said. "And being an astronaut is a cool job. But there are a lot of great things to do. The important thing is to find something you love to do, and you'll do it well. Life is an amazing thing."

**Next chapter in space travel**

In a ceremony at the Johnson Space Center in Houston, NASA Administrator Jim Bridenstine selected Boe along with an enormous American flag and introduced the selected astronauts, one by one, for the next phase in space travel. He said Boe was "one of the greatest" and "most inspiring" astronauts he has ever seen.

"I am very lucky to have this opportunity to see this next chapter in space travel," said Boe.

Boe is set to be the first American selected to travel to fly on space craft developed not by NASA but by two corporations, which are under contract to develop "space taxis" to the International Space Station. In 2014, Boeing and SpaceX were awarded a combined \$6.8bil (\$RM28.5bil) in contracts from NASA to develop, test and fly space taxis to carry US astronauts into orbit.

All the selected astronauts are

in their 40s and 50s.

Boe is currently training for the crew flight test of Boeing's Starliner spacecraft. As they work to help launch a new phase for conducting space research, both Boeing and SpaceX are working on the next generation of test flights. But test flights are scheduled for sometime next year. Not only will it be the end of a period when American astronauts have had to essentially catch a ride on Russian spacecraft, but this will mark a new phase of travel on newly developed sleek aircraft. Everything from heat shields, about seven months, para-chutes, seats, tools and displays have been developed by teams at each company.

And for those who played a big and small role in space travels, the moment of great joy.

"I was just sick when they ended the programme," said Jean Thomas, a retired teacher who taught Boe in elementary school. "I am so thrilled to get to be a part of this again. And we are so proud of Eric."

Meanwhile, Huffman, who has helped countless students — including one future astronaut — follow their

passions to become scientists, engineers, doctors and inventors, plans to retire at the end of this school year.

But next time Boe launches into space, Huffman plans to be there — once again cheering on the man she remembers as a 12-year-old boy with

tenuous dreams of soaring past the stars.

And this next step in exploration could take astronauts, including Boe, back to the moon, eventually Mars — and beyond. — The Atlanta Journal/Tribune News Service

In this February 2011 file photo, NASA astronauts Boe (left), STS-133 pilot, and Scott Kelly, Expedition 26 commander, take a moment for a photo on the flight deck of space shuttle Discovery while docked with the International Space Station.

PAKAR astronomi percaya asteroid aneh ini berkemungkinan merupakan kapal angkasa buatan makhluk asing.

## Pakar astronomi temui asteroid gergasi misteri

**MASSACHUSETTS, Amerika Syarikat** – Para pengkaji astronomi menemui sebuah asteroid gergasi misteri di dalam sistem solar dan mendakwa bahawa ia merupakan sejenis kapal solar suria makhluk asing yang dihantar untuk mencari tanda-tanda kehidupan di planet lain.

Asteroid misteri yang dikenali sebagai Oumuamua itu dipercayai tiba di dalam sistem solar pada Oktober 2017.

Pakar astronomi daripada Pusat Harvard Smithsonian untuk Astrofizik (CfA) telah menganalisis objek aneh berbentuk seperti cerut itu sewaktu objek tersebut melewati sistem solar pada tahun lepas.

Dalam kajiannya, Shmuel Bialy bersama beberapa orang penyelidik lain merumuskan objek itu berkemungkinan merupakan sebuah ‘kapal rentas tahun cahaya buatan’ la terapung di ruang angkasa dalam bentuk serpihan daripada satu kelengkapan berteknologi canggih.

Mereka turut mengandaikan bahawa Oumuamua merupakan sebuah objek yang dapat beroperasi sepenuhnya dan dihantar secara sengaja ke kawasan Bumi oleh makhluk asing bertamadun.

Oumuamua pertama kali dilihat menggunakan teleskop oleh pusat pencerapan Haleakala di Hawaii pada 19 Oktober tahun lepas. – Agensi

## LAMPIRAN 19

### NEW STRAITS TIMES (PULSE): MUKA SURAT 50 & 51

#### TARIKH: 3 NOVEMBER 2018 (SABTU)

**T**HE tab of the soda can is pulled back, before it comes a glass filled with fizz. The fizz is a taste-mesmerising, a thirst-quenching lullaby on a blistering hot day. Coca-Cola or Coke remains the perennial favorite of many, and is one of the world's most valuable brand, often associated with happiness. What else could constitute happiness than a tall glass of ice-cold Coke? —Oscar-Davis means "Delicious Happiness" in Mandarin!

It was Andy Warhol who put it bluntly: "You can be watching TV and see Coca-Cola. You can't see people who don't drink Coke. Liz Taylor drinks Coke, and just think, you can drink Coke, too. A Coke is a Coke and no amount of money can get you a Coke that's the one the person is drinking."

The product that has given the world its best-known soft drink was born in Atlanta, Georgia, on May 8, 1886. A local pharmacist named Dr John Stith Pemberton produced the syrup for Coca-Cola and carried a jug of the new product down the street to a local restaurant. There, it was sampled, pronounced "excellent" and placed on sale for five cents a glass at a soda fountain drink.

Coca-Cola has been tussled with the new syrup to produce a drink that was once "Delicious and Refreshing," a theme that continues to echo today wherever Coca-Cola is sold around the world. In that year, Pemberton sold an average of nine servings of Coca-Cola each day. Today, that number has increased to 1.9 billion servings a day, worldwide.

With a strong balance sheet and reliable cash flows from its traditional carbonated soft drink business — where it is a market leader — Coca-Cola is well-positioned going away. But the shifting times and seasons have led this world of brand leader to one of its most challenging years.

Coca-Cola has set a new target of environmentalism. After all, it has regularly a massive ecological footprint that few companies can match — and packaging forms a big part of that.

For instance, Coca-Cola's senior director of environmental policy, Dr Ben Jordan, Coca-Cola is on track in meeting its environmental targets. This was the case during a recent speak at the 2018 Sustaining Our World & Waste Association Congress and Plasticsity Malaysia sustainability conference held recently, on Coca-Cola's ambitious new packaging vision called "World Without Waste".

A leading drink manufacturer is combating the dire plastic waste issue with a brand new strategy, writes Elena Koshy

#### THE ISSUE OF WASTE

Ever since the technology to engineer polymers in creating plastic on a mass scale was introduced in the 1950s, this-by-product of the petrochemical industry has proved to be a major manufacturing process. The ubiquitous plastic soon seemed instantly useful to our daily lives and has become near indispensable. It is everywhere — in our containers, bottles, electronics, food trays, cups and paints. Our cars depend on it, so do our computers, mugs and drain pipes. It's that global packaging material of choice. We sleep on it, wear it, watch it, and are in

direct bodily contact with it in one form or other all day and night.

On the other, it seemed to have profound social benefits. However, the issue is a catch-22. The more we use plastic, the more it pollutes our environment. Plastic materials sometimes sticks around for centuries. When exposed to sunlight, oxygen and the action of waves, currents and tides, plastic fragments turn into smaller and smaller bits. These microscopic or nano-sized particles enter the food chain, the air, the soil and the water we drink. There seems to be no getting rid of plastics from our environment.

The massive and worrying increase of plastic waste in our oceans and increasingly in our food chain, speaks of our increasing dependency on throwaway items like single-use plastics. More than 400 million plastic drinking bottles were disposed in 2016 across the world, up from about 300 million a decade ago. Fewer than half of the bottles bought in 2016 were sent for recycling, and less than one per cent of those collected were turned into new bottles.

Instead, most plastic bottles produced end up in landfills or in the ocean.

Between five million and 13 million tonnes of plastic leak into the world's oceans each year to be ingested by sea birds, fish and marine mammals. 2016 alone, was the year that contained most plastic by weight than ever, according to research by the Ellen MacArthur Foundation. According to the environmental activist group Greenpeace, the largest beverage manufacturer, Coca-Cola reportedly manufactured more than 110 billion plastic bottles in 2016.

#### COMMITMENT TO THE ENVIRONMENT

"No one's arguing that there's an issue. Everyone agrees that there's an issue," says Jordan. In Malaysia, adding: "We, as global brands and smart regions, brands as well, have helped create the problem. Now let's be at the forefront of solutions to the problem."

The Coca-Cola Company, Jordan says, will work with a host of partners in the coming years to deliver its "World Without Waste" packaging vision, which includes

Reduce, reuse, recycle. Reuse when you can, recycle when you can't and choose sustainable materials. Don't litter and keep your waste out of the environment.

Dr Ben Jordan

Plastic is an ever-growing danger to marine ecosystems throughout the world.

communities and consumers, we'll find the best path forward — market-based market-driven environmentalism," he shares.

Recyclable packaging is key to their "World Without Waste" strategy which involves refining how bottles and cans are made, how they're used and then recycled and repurposed. Because our business is dependent on bottles and cans, we've made our entire supply chain fully recyclable. We have a new and sustainable packaging system in place.

We're hopeful that this will be good for our business and the communities where we operate.

The affable father-of-two is passionate about the environment. With a PhD in Environmental Policy, he has been advocating for environmental issues, change in packaging and agriculture with The Coca-Cola Company.

"My love for nature began whilst I was growing up in a peach farm back in rural Georgia," he reveals, grinning. "I come from an autocracy family and I spent a lot of my growing-up years out in the orchards and fields, helping my parents farm the land. When I got into the university and was deciding on what specialty to get into, it was a pretty easy decision to get into environmental engineering."

Soon after obtaining his Masters, Jordan

joined The Coca-Cola Company and never looked back. "I'd go back to school after 10 years and get my PhD though," he adds, chuckling.

As a company dedicated to making a positive impact, Jordan believes The Coca-Cola's packaging initiatives is an extension to the company's legacy of work on water-replenishment and sugar reduction... because it's right for our world and because it's right for us, as individuals," he adds. This initiative on packaging is just as critical as our work on beverage choice. Particularly as we expand or grow in many types of markets, it's the time to expand our efforts in these areas.

Still, littering isn't merely an issue exacerbated by man-made debris. The Coca-Cola's packaging initiatives is an extension to the company's legacy of work on water-replenishment and sugar reduction... because it's right for our world and because it's right for us, as individuals," he adds. This initiative on packaging is just as critical as our work on beverage choice. Particularly as we expand or grow in many types of markets, it's the time to expand our efforts in these areas.

"Stop Littering," concludes Jordan, emphatically. "It's been said again and again. 'Reduce, reuse, recycle.' Reuse when you can, recycle when you can't and choose sustainable materials. Don't litter and keep your waste out of the environment." [ekoshy@not.com.my](mailto:ekoshy@not.com.my)

Sea creatures mistake plastics and other trash as food and ingest it. This causes blockages within their digestive system and eventual death.

— collecting and recycling a bottle or can for every drink it sells globally by 2025 and renewing its focus on the entire packaging lifecycle.

"WorldWithoutWaste" is our new global approach to sustainable packaging, he explains. "We've been investing in sustainable packaging for many years. In fact, if you go back to the late 1960s and early '70s, we were the first company to conduct a 'cradle-to-cradle' assessment on packaging." Back in those days, he says, it was about litter reduction and keeping litter off the highways.

But it's time to do more, he continues. "The way we design, create — and specifically marine debris — is more visible, and more of a threat to our planet than ever. The way we package products and we work with other companies, we have a responsibility to help solve it and ensure bottles and cans don't end up where they don't belong," says Jordan, thinking after a pause. "We have to take the lead on this, not just our consumers. Our consumers expect us to lead the way. So we are."

According to Jordan, a team of more than 40 people in a global system — arms of associates from corporate, business units out in the field and Coca-Cola's bottling partners — had been working on this strategy for nearly two years. "Our leadership has been extremely involved, and we shared it with several external stakeholder groups, who provided input before launch. We also considered other inputs based on evolving stakeholder regu-

# Robot hantar barang ke rumah penduduk

■ LONDON 2 NOV.

**R**OBOT penghantar barang pertama di dunia dilancarkan di United Kingdom (UK) dan memulakan perkhidmatannya di bandar Milton Keynes.

Bandar itu merupakan yang pertama menggunakan robot keluaran firma Starship Technologies selain San Francisco yang akan memulakan penggunaannya lewat tahun ini.

Penduduk bandar Buckinghamshire akan menerima barang yang dihantar oleh robot terbabit ke pintu rumah masing-masing dengan bayaran yuran 7.99 pound (RM43) sebulan.

Perkhidmatan itu juga boleh diperoleh menerusi aplikasi *Starship Deliveries* yang boleh dimuat turun menerusi iOS dan Android, lapor portal *Daily Mail*.

Pandu uji robot berkenaan telah dilakukan di beberapa jalan raya di London untuk menghantar makanan dan di beberapa syarikat di California yang sering menggunakan perkhidmatan penghantaran barang.

Para pelanggan yang menggunakan perkhidmatan itu akan diberi 'alamat peribadi' untuk menggantikan alamat rumah mereka.

Bungkusan akan dihantar ke alamat tersebut menggunakan

cara biasa kemudian diambil dan dihantar ke alamat rumah pelanggan mengikut tempoh masa sesuai yang boleh diperoleh melalui hub Starship.

Milton Keynes dipilih sebagai kawasan ujian teknologi itu kerana mempunyai lorong yang luas dan susun atur moden yang mesra robot.

Robot berukuran 55 sentimeter (sm) lebar dan 70 sm panjang itu beroperasi menggunakan radar, GPS dan kamera 360 derjah.

Menggunakan enam roda dan mampu bergerak sepantas 6.4 kilometer sejam, robot itu boleh membawa barang seberat 10 kilogram.

BARISAN robot bersiap sedia untuk menghantar barang ke rumah penduduk di Milton Keynes, United Kingdom. - AGENSI
