# Govt scraps country's first geothermal power plant project

**KUALA LUMPUR:** The approval given to Tawau Green Energy Sdn Bhd to build the country's first geothermal power plant has been revoked on Aug 29, the Dewan Rakyat was told yesterday.

Energy, Green Technology, Science, Climate Change and Environment Minister Yeo Bee Yin said the government decided to scrap the project due to the firm's failure to carry out the project.

"There was no project progress and the drilling operations have ceased since the third quarter of 2016.

"It seemed that the company has ceased its operation and affairs at the site.

"Hence, the approval was revoked and the approved capacity quota of 37 megawatt from the project would be reallocated to new power plant projects with capabilities, especially in biogas, biomass and small hydro," she said in a reply to a question from Chan Foong Hin (DAP-Kota Kinabalu) on the status of the project in Tawau during the ministerial question time.

In answering a supplementary question, Yeo said the government was willing to call an open tender if there were firms interested in continuing the project.

*"There was no project progress and the drilling operations have ceased since the third quarter of 2016.*

PERSIDANGAN DEWAN RAKYAT

## Prasyarat pembaharuan lesen: Kerajaan sedia disaman Lynas

Bee Yin pada sidang media di lobi Parlimen, semalam.

**KERAJAAN** sedia berdepan tindakan undang-undang dari Lynas Corporation Ltd (Lynas), susulan prasyarat pembaharuan lesen Lynas Advance Materials Plant (LAMP) dikenakan terhadap syarikat berkenaan.

Menteri Tenaga, Teknologi, Sains, Perubahan Iklim dan Alam Sekitar, Yeo Bee Yin berkata, keputusan kerajaan itu berlandaskan undang-undang.

Ahli Parlimen Bakri itu berkata, prasyarat itu juga berdasarkan janji Lynas sendiri pada 2012 yang menyatakan komitmen untuk menghantar sisa radioaktif keluar dari Malaysia ke negara asal, Australia.

"Saya bercakap dengan Peguam Negara, Tommy Thomas pagi tadi (semalam), dan kita bersedia (berdepan tindakan undang-undang) kerana apa yang kita lakukan berdasarkan kedaulatan undang-undang.

"Lynas tidak boleh datang ke negara ini dan cuba menetapkan bagaimana kedaulatan undang-undang ditegakkan di Malaysia. Mereka juga tidak boleh meminta pengecualian seolah-olah berhak mendapat pengecualian itu," katanya di lobi Parlimen, semalam.

Beliau mengulas kenyataan Lynas yang mahu mempertimbangkan tindakan undang-undang terhadap kerajaan selepas Kementerian Tenaga, Sains, Teknologi, Alam Sekitar dan Perubahan Iklim mengenakan dua syarat untuk pembaharuan lesen LAMP.

Bee Yin berkata, Lynas kini menyimpan 450,000 tan sisa WLP dan berisiko tinggi kepada penduduk setempat, khususnya jika berlaku bencana seperti banjir besar.

"Berdasarkan undang-undang, sisa buangan yang boleh disimpan hanya kira-kira 20 tan atau 180 hari had simpanan sementara.

"Lynas perlu membawa sisa radioaktif ini keluar dari Malaysia kerana tiada lokasi selamat untuk menyimpannya di negara ini," katanya.

SUSULAN LAPORAN KHAS PENCEMARAN SUNGAI DI HULU SUNGAI LEMBING

***Keadaan sungai Hulu Kuantan turut terjejas*** *akibat aktiviti pembalakan di Hulu Sungai Lembing.*

## Syarikat balak ingkar syarat EIA

→ Pembalak didakwa tiada pelan pengurusan alam sekitar

**Oleh Mohamad Azim Fitri Abd Aziz**
cnews@nstp.com.my

**Kuantan**

Jabatan Alam Sekitar (JAS) membuka dua kertas siasatan berkaitan pelanggaran laporan syarat kajian impak alam sekitar (EIA) membabitkan syarikat pemegang lesen pembalakan, Mentiga Corporation Berhad di Hulu Sungai Lembing.

Pengarah JAS Pahang, Rosli Zul, berkata kertas siasatan itu membabitkan pelanggaran syarat tidak menyediakan alat kawalan pelepasan air larian sewajarnya seperti termaktub dalam syarat kelulusan EIA yang dikeluarkan pada Februari 2014.

Katanya, syarikat itu didapati tidak mempunyai pelan pengurusan alam sekitar (EMP) di kawasan projek berkeluasan 4,046 hektar.

**Dua kertas siasatan dibuka**

"Kita sahkan dua kertas siasatan dibuka berkaitan kesalahan mereka. Siasatan lanjut sedang dilakukan termasuk mengumpul bukti di lokasi pembalakan dan mendapatkan dokumen sewajarnya.

"Sebaik siasatan dilengkapkan kita akan rujuk kepada timbalan pendakwa raya untuk mendapat izin pendakwaan," katanya di sini, semalam.

BH dalam laporan khas baru-baru ini, mendedahkan berlaku pencemaran di beberapa sungai di Hulu Sungai Lembing akibat pembalakan tidak terancang.

Ekoran pendedahan itu, siasatan menyeluruh dijalankan Jabatan Perhutanan dan JAS Pahang di kawasan pembalakan dan didapati berlaku pelanggaran syarat EIA.

Rosli memaklumkan pihaknya sudah memanggil wakil syarikat berkenaan serta kontraktor pembalakan bagi membantu siasatan.

## Sedia berdepan tindakan Lynas

Kerajaan sedia berdepan tindakan undang-undang daripada Lynas Corporation Ltd (Lynas) susulan prasyarat pembaharuan lesen Lynas Advance Materials Plant (LAMP) dikenakan terhadap syarikat itu.

Menteri Tenaga, Teknologi, Sains, Perubahan Iklim dan Alam Sekitar, Yeo Bee Yin berkata, keputusan kerajaan mengenakan prasyarat itu berlandaskan undang-undang.

Katanya, prasyarat itu juga berdasarkan janji Lynas sendiri pada 2012 yang menyatakan komitmen untuk menghantar sisa radioaktif keluar dari Malaysia ke negara asal, Australia.

"Saya bercakap dengan Peguam Negara pagi tadi dan kita bersedia (berdepan tindakan undang-undang) kerana apa yang kita lakukan berdasarkan kedaulatan undang-undang.

"Lynas tidak boleh ke negara ini dan cuba menetapkan bagaimana kedaulatan undang-undang ditegakkan di Malaysia.

"Mereka tidak boleh meminta pengecualian seolah-olah berhak mendapat pengecualian itu," katanya di lobi Parlimen, semalam.

Beliau mengulas kenyataan Lynas yang mahu mempertimbangkan tindakan undang-undang terhadap kerajaan selepas Kementerian Tenaga, Sains, Teknologi, Alam Sekitar dan Perubahan Iklim mengenakan dua syarat untuk pembaharuan lesen LAMP.

Syarat itu adalah LAMP perlu memastikan sisa *water leached purification residue* (WLP) yang mengandungi bahan radioaktif dihantar keluar dari Malaysia.

Bagi sisa buangan terjadual *neutralization underflow residue* (NUF) yang bukan radioaktif, LAMP perlu kemukakan pelan tindakan bagi pelupusan buangan terkumpul sebelum dipertimbangkan bagi permohonan kelulusan mengikut Peraturan 9 (6) dan 9 (7), Peraturan-Peraturan Kualiti Alam Sekeliling (Buangan Terjadual) 2005.

# Penduduk tak puas hati perakuan selamat

**KOTA TINGGI** - Perakuan selamat oleh kerajaan negeri berkenaan tapak sampah baharu Lembaga Bandaran Johor Tenggara (LBJT) yang dicadang berhampiran penempatan penduduk Gugusan Lok Heng masih menimbulkan rasa kurang puas hati dan keraguan dalam kalangan penduduk.

Adun Johor Lama, Rosleli Jahari berkata, isu telah dibawa ke sidang Belanjawan Johor 2019, semalam.

Bagaimanapun katanya, beliau menerima respons penduduk bahawa mereka tetap tidak puas hati dan ragu.

"Saya telah bawa isu ini dalam soalan lisan dan ucapan perbahasan saya di sidang Belanjawan Johor 2019.

"Walaupun YB Exco telah beri jawapan bagi pihak kerajaan negeri, saya sendiri bersama penduduk tidak puas hati kerana info bercanggah yang kami terima sebelum ini," katanya dalam kenyataan media, semalam.

Rosleli berkata, perkara sama telah pun dibawa ke mesyuarat tindakan Kota Tinggi sebelum ini.

Katanya, pihak berkaitan menjelaskan sampah tersebut dari bukan saja dari kawasan Bandar Tenggara, malah dari Kota Tinggi serta Rapid Pengerang.

Tambahnya, turut menjadi persoalan dan tanda tanya setakat ini, belum lagi diperoleh kajian Jabatan Alam Sekitar (JAS).

Jelasnya, malah kenyataan ketika mesyuarat tindakan daerah itu turut menyebut terdapat sumber sampah dari Kompleks Bersepadu Pengerang (PIC) Rapid Petronas yang terkandung sisa toksik dan kimia dilupus di kawasan tersebut.

"Oleh kerana perbezaan info ini, kami mahu pihak terbabit beri jawapan meyakinkan berserta jaminan bersandarkan laporan," katanya.

**TAPAK LUPUS SAMPAH**

## ...ntah bina tapak pelupusan sampah di Lok Heng

Kemudahan jalan untuk ke tapak pelupusan sampah yang sudah siap dibina.

...Projek pembinaan ...ampah di Lok Heng ...s RM15 juta didesak untuk dibatalkan.

Adun Johor Lama, Rosleli Jahari mendakwa, projek berkenaan bakal membuatkan penduduk gugusan Lok Heng terdedah kepada ancaman penyakit.

Menurutnya, ia termasuklah ancaman denggi dan menambahkan lagi masalah kekurangan air bersih yang sememangnya menjadi isu di gugusan tersebut.

"Saya dimaklumkan tapak berkenaan rupanya adalah tapak pembuangan untuk seluruh daerah Kota Tinggi termasuk dari Pengerang dan Bandar Tenggara.

"Ini sec... tidak langsung bahan-bahan sampah, ...ia dan toksik akan dibuang di situ. Isu ...a akan terjadi adalah kehadiran serangga lalat, ... dilaksanakan.

Katanya, secara fizikalnya tapak projek itu terlalu hampir dengan penempatan di kawasan gugusan di mana jika dikira jarak persimpangan Lok Heng dengan persimpangan ta-...

"Sungai yang berada dekat dengan tapak ini, mungkin tercemar dan akan bersambung dengan anak sungai yang menjadi sumber air ... takungan pam air Lok Heng.

"Ini mendatangkan kesan...

SUNGAI LEMBING

## PAHANG DoE OPENS 2 INVESTIGATION PAPERS

Concession firm has no environmental management plan, says dept director

MOHAMAD AZIM FITRI ABD AZIZ
**KUANTAN**
cnews@nstp.com.my

THE state Department of Environment (DoE) has opened two investigation papers in connection with the breach of Environmental Impact Assessment (EIA) regulations in upstream Sungai Lembing involving logging concession company Mentiga Corporation Bhd.

Its director, Rosli Zul, said the investigations papers were opened after the company failed to provide a water discharge control device as stipulated in the EIA regulations, which was issued in February 2014.

He said the company, which was awarded the logging licence, also did not have an environmental management plan for the project area covering some 4,046ha.

"We can confirm that two investigation papers have been opened against the offence committed by the firm... further investigations are being conducted, including collecting samples and proof at the logging site and gathering the necessary documents.

"Once our investigations are completed, we will refer the case to the deputy public prosecutor's office and seek permission to charge those involved in court," he said.

The New Straits Times Press, in a recent special report, revealed that some 500ha of jungle in Hulu Sungai Lembing had been felled indiscriminately without regard to the impact on the environment and on tourism in the surrounding areas.

Following the report, the state Forestry Department and Pahang DoE inspected the site and initial investigations revealed that there had been a breach of EIA regulations.

Rosli said DoE had called two representatives from the company, including the logging contractor, to facilitate investigations.

"The representatives provided their cooperation for us to complete our investigation papers. The case was investigated under Section 34A(7) of the Environmental Quality Act 1974, which carries a fine of not more than RM500,000 or a prison term of up to five years, or both."

He said DoE was working together with the state Forestry Department to gather information to help complete the investigation papers.

Asked if there would be a stop-work order issued for logging until the probes were completed, Rosli said there was no need to do so as the logging at the site had been completed.

However, he said, the firm had been ordered to carry out mitigation works at the logging site as required by the EIA regulations.

Salah sebuah kediaman yang terjejas banjir kilat, semalam.

# Enam kediaman terjejas banjir kilat

**KAPAR** - Enam buah rumah terkesan akibat kejadian banjir kilat yang berlaku di beberapa kawasan termasuk di Jalan Benteng, Jalan Kenangan, Taman Daya Maju serta Taman Daya Meru, semalam.

Ketua Bomba dan Penyelamat Klang, Samsol Maarif Saibani berkata, kejadian banjir berkenaan berlaku akibat hujan lebat serta keadaan Sungai Kapar yang tidak dapat menampung jumlah kapasiti air yang banyak.

"Skuad Unit Pengurusan Bencana Negeri (UPBN) Selangor membuat pemantauan darat dan juga udara di sekitar lokasi kejadian dan hasil dari pemantauan darat, masih terdapat takungan air di laman rumah mangsa (dalam proses surut).

"Punca berlakunya banjir kilat akibat hujan lebat dalam jangka masa singkat serta Sungai Kapar yang kecil tidak dapat menampung kapasiti air tinggi lalu melimpah ke kawasan penempatan.

"Dianggarkan kira-kira enam buah rumah yang terkesan banjir kilat namun situasi dalam keadaan terkawal dan tiada pusat pemindahan dibuka setakat ini," katanya menerusi satu kenyataan.

Menurutnya, setakat ini keadaan air hanya memenuhi kawasan kediaman rumah terlibat dan tidak memasuki rumah dan kerja-kerja pengepaman air keluar sedang giat dijalankan oleh pihak berwajib.

PENANG

## University's 'recycling rangers' all for Zero Waste Campaign

THE School of Communication of Universiti Sains Malaysia has trained 20 of its students to become "recycling rangers" in conjunction with the Zero Waste Campaign: "Gorange".

Two representatives from Consumers Association of Penang (CAP) taught them the proper ways of collecting and segregating recyclable items, and instilled the recycling habit among the students.

The rangers were also trained to repurpose old items such as converting old clothes into creative bags.

CAP representative Saraswathi Devi Odian said the rangers showed determination and interest throughout the training session.

One of the rangers, Balqis Mohamed Ismail, said the training was beneficial as the information shared by CAP's representatives was useful.

"It is important to stop the use of plastics as a form of support for recycling activities.

"Such exercises will help the rangers in carrying out their tasks during the campaign, especially in helping to collect and segregate recyclable items during the collection hour," she said.

Bangi

Bagi memupuk dan mempelajari etika sosial korporat dalam perniagaan, sekumpulan penuntut Universiti Kebangsaan Malaysia (UKM), Bangi menganjurkan program mendekati alam sekitar yang di kenali sebagai *Matoa For Future Genarations*, di kampus universiti itu.

Seramai 20 penuntut Tahun Dua Ijazah Sarjana Muda Pengurusan Perniagaan dan Perakaunan terbabit dalam program di Fakulti Ekonomi dan Pengurusan UKM semalam.

**Berbakti kepada alam sekitar**

Ia adalah pengalaman baharu mereka sebagai penuntut untuk mempelajari satu daripada etika sosial korporat dalam perniagaan yang bukan berkaitan dengan pelanggan atau kertas kerja sahaja, malah turut terbabit dalam pemuliharaan alam sekitar.

Ketua Program, Muhammad Fakhrullah Nor Azmin, berkata program itu adalah sebahagian daripada projek bagi mata pelajaran Etika Dan Tanggungjawab Sosial Korporat.

Beliau berkata, bagi tujuan itu kumpulannya memilih program mendekati dan berbakti kepada alam sekitar di sekitar fakulti.

"Program dibantu pensyarah kami, Dr Shifa Mohd Nor yang turut dibantu oleh dekan fakulti.

"Kami percaya cara ini mampu memupuk rasa cinta terhadap alam sekitar, sekali gus membantu mencantikkan persekitaran fakulti kami," katanya.

Advertorial

Lynas CORPORATION LTD

**Khairul,**
Senior Manager
Solvent Extraction

"I hope our fair minded YAB Tun hears us. We appreciate what you have done for Malaysia and we want to contribute to your vision. We joined Lynas to play a role in the development of technology.

**WE** are **Malaysians**, WE are the workers, WE ensure we follow the law, WE ensure our workers, families and communities are safe, WE **ensure the environment is protected**. We Malaysians will never jeopardise our generations' future. So dearest Tun, please hear our plight and have trust on us."

**Kartina,**
Superintendent
Planning & Inventory

"I worked in a Petrochemical & Utilities company in Gebeng and then Lynas. Both industries have risks. Both companies **benchmark safety and environmental performance against international standards and local regulations.**

I am proud that Lynas puts the safety of our people, community and environment as its number 1 priority at all times."

**Jumaat,**
Senior Manager
Organisational Development

"It took me 9 months to join Lynas because I worried about what the anti-Lynas groups said. I put my trust in Allah SWT.

Learning and seeing the operations myself, I regret not joining sooner.

This is my 6th year. **I confidently confirm the competency of our people** and processes which ensure we always adhere to local and international environmental laws."

**Azri,** "As an experienced chemical engineer, Lynas has provided me with totally new challenges and with that I have gained new expertise. We operate our plant with confidence and pride today and are committed to continuously improving every day."

**Mimi Afzan,**
Vice President – People and Culture
"I have always been proud working in Lynas. Joined as a pioneer and will continue to be with the team, fight with the team and succeed with the team! Together, with the team, we care for our community."

**Fahimah,** "I'm proud to be part of the Lynas family that believes in promoting and empowering women in an industry that is dominated by men. Thanks to our management, women have an equal chance to grow."

**Bazilah,** "I joined Lynas when I was 4 months pregnant. I was really surprised I was offered the job. Lynas has a great policy for moms like me, 3 months maternity with flexible workdays in the 4th month. I was pregnant again in my 2nd year of work with Lynas. I have been welcomed back each time – and both my babies are in great health."

**SAVE OUR JOBS, SUPPORT MALAYSIA'S FUTURE**

**Rafali,** "My team and I are committed to ensure our import and export activities comply with all international and local regulatory requirements and we ensure zero harm to all around us. Our team is committed to excellence!"

**Haizam,** "I am from Balok. I joined Lynas in 2010. In 2011 my friends asked why I worked in Lynas. In 2016 they asked how to apply for a job. In 2018 those who missed out said served me right. I just smiled. I know Lynas is SAFE and I trust our government."

**Fikri,** "I was 1 of 6 in the 1st batch of Associate Engineers in 2010. I experienced the construction, start up and commissioning of the plant – the only rare earth plant outside of China. Not many Kuantan boys get this chance. I worked real hard to prove the investment made in me is worth every ringgit. Now I am the Acting Superintendent of the Control System ensuring that every system is built in accordance to the highest standards."

**Aizul,** "All research on our residues are supported by scientific facts, conducted by expert independent consultants, research agencies and local research universities.
I am an agriculturalist and I am accountable to ensure the research is conducted properly."

**Siew Fong,** "I am proud to be in the Lynas family. I believe we can help Malaysia to achieve its vision to become a developed sustainable nation. As the only Rare Earth producer outside China, we have really put Malaysia on the map!"

**Pak Raja,**
Head of Balok Fisherman

"I am the elected head of the Fishermen of Balok and I represent my people not some politicians. I can assure we have never caught fishes that are poisonous due to chemicals or caught fishes that look funny because of radiation.

I have never seen these people coming to talk to me or my people about anything. But **I know these Lynas people**. They have been regularly with us here. So to these people, stop using us as a political issue to win votes."

**CS Lee,**
Supplier

"I have been supplying pumps to many factories in multiple industries, medium or large.

I visited the factories myself and I find that among similar industries, Lynas is very serious **about housekeeping and the plant environment is very clean**.

The workers are friendly and always have safety as their priority. Business is good and payment is prompt."

**Pak Shikh,**
Head of Chengal Lempong

"Lynas has always been there for us. Their staff have been involved with our village activities since they started from direct contribution, fixing unfortunate homes to participating in our village feasts.

**Our children have benefitted from the Academic Ivory Tower Programme** and some of them will be graduating soon. We have never had any doubt of their safety as their staff is a good representation of that."

We are Lynas **Malaysia**

**GAMBAR menunjukkan senja di planet Marikh kelihatan berwarna kebiruan-biruan.**

# Cahaya matahari terbenam kebiru-biruan di planet Marikh

**WASHINGTON** – Tarikan terhadap cahaya kebiruan-biruan ketika Matahari terbenam di planet Marikh kembali mendapat perhatian umum selepas beberapa gambar daripada kenderaan rover Curiosity milik Pentadbiran Angkasa dan Aeronautik Negara (NASA) dikongsi di media sosial.

Imej matahari terbenam itu kembali tular di Twitter apabila ramai pengguna media sosial bertanya kenapa planet Marikh yang dikenali sebagai 'planet merah' mempunyai cahaya senja kebiruan-biruan.

Warna kebiruan-biruan itu dikatakan terhasil selepas debu halus di Marikh 'menapis' cahaya matahari dan lebih memudahkan cahaya warna biru menembusi atmosfera planet tersebut.

Apabila cahaya biru itu bertebaran, ia lebih dominan berbanding warna lain. Langit senja Marikh juga kelihatan berwarna kuning hingga oren berikutan spektrum cahaya kuning dan merah berselerakan di langit.

Waktu senja di planet Marikh juga bertahan lebih lama daripada di Bumi disebabkan cahaya matahari dipantulkan oleh debu halus pada altitud tinggi ke arah sisi gelap planet tersebut. – Agensi

# Pelepasan karbon dioksida sama 'kelajuan kereta api'

**NEW YORK 6 Dis.** - Kadar pelepasan gas rumah hijau global merekodkan peningkatan drastik dan dijangka mencatatkan rekod baharu, tahun ini sekali gus meletakkan dunia berdepan kesan pemanasan global lebih cepat daripada dijangka.

Para saintis menyamakan pelepasan karbon dioksida di seluruh dunia seperti kelajuan kereta api yang antara lain diakibatkan oleh keghairahan manusia memiliki dan menggunakan kenderaan yang digerakkan minyak dan gas.

Pensyarah Sains dan Sistem Bumi Universiti Stanford, Rob Jackson mendedahkan penggunaan minyak petrol menunjukkan peningkatan secara drastik dalam tempoh lima tahun.

"Itu adalah satu keadaan yang cukup memeranjatkan," katanya sebagaimana lapor *New York Times*.

Beliau merupakan satu daripada penulis dua kajian mengenai pelepasan karbon yang diterbitkan oleh Global Carbon Project.

Sekumpulan 100 saintis dari lebih 50 institusi akademik dan penyelidikan mendapati pelepasan gas rumah hijau meningkat 1.6 peratus tahun lalu.

Menurut penyelidik, pelepasan gas karbon diramal meningkat kepada 2.7 peratus pada tahun ini.

Usaha mengurangkan pelepasan karbon dioksida adalah amat penting untuk memastikan pemanasan global dapat dihentikan.

Tiga tahun lalu, lebih 200 negara terlibat dalam Perjanjian Paris yang tujuannya adalah untuk mengekalkan pemanasan global di bawah dua darjah *Celcius*.
