Pabuk jauhi perairan negara

Kuala Lumpur: Jabatan Meteorologi Malaysia (METMalaysia) menamatkan amaran daripada Pabuk semalam, selepas ribut tropika itu semakin menjauhi perairan Malaysia dan tidak lagi memberi ancaman kepada negara.

Ketua Pengarah METMalaysia, Alui Bahari, berkata ribut tropika itu kini berada pada kedudukan 8.9°U 98.2°T dan dijangka bergerak 15 kilometer sejam (kmsj) ke arah barat laut menuju Teluk Bengal.

"Keadaan ini boleh menyebabkan hujan lebat, angin kencang melebihi 50kmsj dan laut bergelora dengan ketinggian ombak melebihi 3.5 meter di kawasan perairan Phuket," katanya dalam satu kenyataan, semalam.

Beliau berkata, jarak ribut itu dari bandar Arau, Perlis adalah 362km dan Langkawi, Kedah (345 km).

Alu berkata, kenyataan yang dimuat naik di laman web Jabatan Meteorologi Malaysia itu, adalah makluman terakur mengenai ribut tropika Pabuk.

Lapangan terbang Langkawi operasi seperti biasa

Sementara itu di Langkawi, operasi Lapangan Terbang Antarabangsa Langkawi pagi semalam, berjalan seperti biasa biarpun pulau pelancongan terbabit dilaporkan akan menerima tempias daripada Pabuk.

Pengurus Lapangan Terbang Antarabangsa Langkawi, Jefri Ramli, berkata pihaknya tidak menerima sebarang arahan untuk menangguh atau membatalkan jadual penerbangan.

"Kita mencatatkan lebih 30 penerbangan keluar masuk dan semuanya beroperasi seperti biasa.

"Lapangan Terbang Antarabangsa Langkawi juga tetap beroperasi seperti biasa dan keputusan membatalkan penerbangan hanya dibuat syarikat penerbangan sendiri, selepas mendapat maklumat dari Jabatan Penerbangan Awam (DCA).

"Bagaimanapun, kita akan sentiasa berhubung dengan METMalaysia bagi mendapatkan maklumat terbaru," katanya ketika dilihubungi, semalam.

Info

Ribut tropika Pabuk

- Ribut tropika itu kini berada pada kedudukan 8.9°U 98.2°T .
- Dijangka bergerak 15 kilometer sejam (kmsj).
- Keadaan ini boleh menyebabkan hujan lebat, angin kencang dan laut bergelora di kawasan perairan Phuket.

BENCANA

Cuaca di Perlis, Kedah dan Pulau Pinang bertambah baik. Ini membolehkan amaran yang dikeluarkan pada 28 Disember lalu, ditamatkan”

Alui Bahari,
Ketua Pengarah
METMalaysia

METMalaysia tarik semula amaran ribut tropika

Langkawi: Semua aktiviti pantai sudah dibenarkan beroperasi seperti biasa, selepas bendera merah diturunkan susulan amaran ribut tropika Pabuk ditamatkan Jabatan Meteorologi Malaysia (METMalaysia) semalam.

Penamatan amaran pada jam 11 pagi itu, dibuat selepas ribut tropika Pabuk berada pada jarak 345 kilometer (km) dari Langkawi.

Jurucakap Angkatan Pertahanan Awam Malaysia (APM) Langkawi berkata, pihaknya sudah menerima pemakluman mengenai penamatan amaran pada jam 11.40 pagi semalam.

“Buat masa ini, kami sudah menurunkan bendera merah di beberapa bahagian di Pantai Chenang, bagi membolehkan pengunjung melakukan aktiviti seperti berenang ataupun beriadah.

“Bagaimanapun, kita masih me-

ngekalkan anggota di menara tinjau dan sekitar kawasan pantai, bagi langkah berjaga-jaga,” katanya ketika ditemui di Pantai Chenang di sini, semalam.

Kedudukan jauh dari negara

METMalaysia mengumumkan penamatan amaran ribut tropika Pabuk, selepas kedudukannya didapati berada pada jarak 345km dari Langkawi dan 362km dari Arau, Perlis.

Ketua Pengarah METMalaysia, Alui Bahari, berkata ribut terbabit semakin menjauhi perairan Malaysia, sekali gus tidak memberi ancaman kepada negara.

“Keadaan cuaca di Perlis, Kedah dan Pulau Pinang juga dijangka bertambah baik.

“Ini membolehkan amaran yang dikeluarkan pada 28 Disember lalu, ditamatkan,” katanya dalam satu kenyataan.

Kelmarin, akhbar melaporkan Pengarah Pejabat Meteorologi Pulau Pinang, Ling Leong Kwok, berkata Pabuk yang melanda perairan Pantai Timur Semenanjung tidak akan membahayai Langkawi secara terus, sebaliknya pulau peranginan itu hanya akan menerima kesan sampaingan akibat keadaan itu.

Katanya, kedudukan angin ribut berada pada jarak 200km ke utara, sekali gus tidak akan membahayai Langkawi secara terus.

Sehubungan itu, beliau berkata, penduduk dan pelancong di Langkawi tidak perlu panik, tetapi berhati-hati dengan keadaan angin kuat dan hujan tempias daripada ribut berkenaan.

Malah, pengusaha feri juga memaklumkan tiada sebarang pembatalan atau pengurangan perjalanan feri ke Langkawi dari Kuala Kedah dan Kuala Perlis.

Fishermen return to sea after stormy days

KUANTAN: The coastal fishermen of Kampung Berserah, near here, have resumed their fishing activities after the weather turned for the better.

A check early yesterday found that the fishermen had started to make preparations to resume fishing activities today by loading up fish containers and ice onto their boats.

Fisherman Aziz Razali, 45, said the fishermen in the village had decided to go to sea due to the good weather.

"The wind has eased and the waves are also moderate. So, we feel we can go out to sea after almost eight days.

"We will also check the Malaysian Meteorological Department's report before making a final decision later," Bernama reported him as saying.

Aziz said the sea was turbulent with huge waves from Tuesday until Friday, believed to be due to tropical storm Pabuk on the east coast of Peninsular Malaysia.

The storm was driven by 40kph to 50kph winds and pushing waves up to 3.5m.

"The sea was most turbulent on Thursday. We dared not go out fearing a storm might occur when we were far out at sea," he said.

Azmi Mohd, 39, said he stayed ashore for more than a week. He repaired his net and made additional fish traps.

The Malaysian Meteorological Department said Pabuk was in the Gulf of Thailand and was expected to be in the waters off Phuket and North Malacca Straits until today and would also affect Perlis, Kedah and Penang.

It was reported that a fisherman was killed and another went missing when their boat capsized off Pattani province when Pabuk hit the south coast of Thailand on Friday, uprooting trees and power poles and swamping some places with water up to 50cm to 100cm deep.

The storm hit the Pak Phanang district of Nakhon Si Thammarat province, where trees crashed down on houses, causing widespread damage.

More than 100 foreign tourists were rescued on Friday from an island off Phuket.

MINGGUAN MALAYSIA (DALAM NEGERI): MUKA SURAT 66

TARIKH: 6 JANUARI 2019 (AHAD)

Ribut Pabuk:
: Kedah,
: Perlis tidak
: terbabit

ALOR SETAR 5 Jan. - Tiada kejadian ribut maupun bencana lain yang dilaporkan berlaku di negeri ini termasuk Pulau Langkawi berikutan daripada tempis ribut tropika Pabuk yang diramalkan melanda negeri-negeri di bahagian utara tanah air, semalam.

Pegawai Bahagian Operasi dan Bencana Angkatan Pertahanan Awam Malaysia (APM) negeri, **Kapten (PA) Saifuddin Abdullah** berkata, pihaknya tidak menerima sebarang laporan mengenai ribut atau kejadian luar biasa yang berlaku sepanjang tempoh ramalan itu daripada semalam hingga awal pagi ini.

Katanya, sebaliknya hanya hujan lebat selain laut bergelora di dua pantai yang menjadi tumpuan pelancong di Langkawi iaitu Pantai Chenang dan Pantai Tengah pada pagi semalam.

"Bagaimanapun, kita akan terus melakukan pemantauan di semua kawasan pesisiran pantai berikutan keadaan laut yang sedikit berauan meskipun cuaca cerah.

"Pelancong telah diberi maklumat untuk berhati-hati melaksanakan aktiviti air, namun anggota APM akan terus melakukan pemerhatian selain memberikan nasihat kepada orang ramai berhubung perkembangan cuaca dari semasa ke semasa," katanya di sini hari ini.

Timbalan Pegawai APM Langkawi, **Leketenan Azam-shah Aperal** pula berkata, para pengusaha sukan air seperti jet ski dan paragliding telah dinasihatkan supaya menangguhkan sementara aktiviti tersebut sebagai langkah berjaga-jaga.

Sementara itu, Jabatan Meteorologi Malaysia mematarkan amaran ribut tropika Pabuk hari ini setelah kedudukan ribut tropika itu dilihat semakin menjauhi perairan Malaysia dan tidak lagi memberi ancaman kepada negara.

Ketua Pengaruhnya, **Ahui Bahari** berkata, ribut tropika itu kini berada di kedudukan 8.9 U 98.2 T dan dijangka bergerak 15 kilometer sejam (kmsj) ke arah barat laut menuju Teluk Benggala.

Pabuk batters the east coast

Northern states must brace for adverse situations as storm passes by

By JO TIMBUONG
and MARTIN CARVALHO
newsdesk@thestar.com.my

PETALING JAYA: Strong winds from Tropical Storm Pabuk have wreaked havoc in the seas off Kelantan and Terengganu but those in the west coast, especially in the northern states, should also be bracing for such condition as it moves towards the Andaman Islands.

Pabuk, which started forming in the South China Sea since New Year's Day, has made its way towards Thailand moving at about 20kph and affected northern states such as Perlis, Penang, Kedah and Perak.

Similar to conditions in the east coast states earlier this week, the Meteorological Department warned of strong winds of up to 50kph as well as waves of up to 3.5m occurring in the seas off Kelantan, Perlis, Kedah and Penang.

Checks on the department's website showed that sea and wind conditions would return to safer levels by tomorrow with waves rising up to 1m on the west coast and 1.5m on the east coast.

Wind conditions will also be reduced to up to 20kph in the east and up to 30kph in the west.

Dangerous situation: Youths playing by the beach amid strong waves and rough weather conditions in Pantai Pulau Kundur, Kota Baru. — Bernama

Satellite images from the weather site www.windy.com showed that Pabuk would be making its way past southern Thailand and hit the Andaman Islands tomorrow.

The situation has calmed in

Terengganu yesterday compared to the tempestuous waves which hit its shorelines as Pabuk raged over the state from Wednesday through Thursday.

Civil Defence Force state director

Lt-Kol Che Adam Abdul Rahman said the people could look forward to improved weather conditions in the coming days.

However, he advised against car-

rying out any activities along the coast to prevent untoward incidents.

Despite the calmer weather, Lt-Kol Che Adam said they would remain on standby to respond to other emergencies throughout the monsoon season, which is expected to last until March.

Meanwhile, flights by Malaysian carriers were not affected by the storm.

Malindo Air chief executive officer Chandran Rama Muthy said it was monitoring the situation closely, although the company did not operate any flights to the south coast of Thailand.

He said flights were usually not affected by rains and if there were any disruption due to the storm, it would merely result in delays.

A Malaysia Airlines spokesman also confirmed that the carrier had not cancelled any of its domestic flights to the northeast of Malaysia, but was keeping a close watch on the weather conditions.

AirAsia does not operate flights to the affected destination in the southern coast of Thailand, which is handled by local carriers.

Bernama reported that ferry services to Langkawi from Kuala Kedah and Kuala Perlis would be operating as usual.

Pabuk: Pengusaha pelancongan teliti cuaca

LUMUT 4 Jan. - Pengusaha sektor pelancongan di daerah ini diingatkan supaya menerusi cuaca dan memahami keadaan laut bagi mengelak kejadian tidak diingini berlaku susulan fenomena ribut tropika Pabuk yang sedang melanda khususnya di beberapa negeri di Semenanjung negara.

Pengerusi Jawatankuasa Pengurusan dan Bantuan Bencana Daerah, Datuk Mohamad Fariz Mohamad Hanip berkata, pengusaha pelancongan yang terlibat ialah di Pantai Teluk Senangin, Pantai Teluk Batik dan Pulau Pangkor.

Menurutnya, mereka juga perlu mendapatkan nasihat daripada Jabatan Laut dan Jabatan Meteorologi kerana kegagalan untuk mengikuti maklumat berkenaan boleh memberi implikasi buruk kepada mereka.

MOHAMAD FARIZ

“Buat masa ini pihak kami sedang membuat pemantauan secara dekat di Pantai Teluk Nipah kerana benteng penahan ombak perlu dibina disebabkan hakisan yang berlaku.

“Benteng penahan ombak itu perlu dibina semula dan memerlukan pengubahan untuk mencegah hakisan serta memusnahkan gerai di kawasan tersebut,” katanya selepas Mesyuarat Penyelarasan Berkaitan Penguatkuasaan Wabak Denggi Daerah Manjung di Bilik Gerakan Pejabat Tanah dan Daerah Manjung di sini hari ini.

Mohamad Fariz berkata, pihaknya juga sentiasa bersedia dalam tempoh 24 jam dan dalam apa sahaja situasi.

“Bekalan keperluan untuk hadapi bencana juga kita dah letak di persekitaran dan boleh diambil dengan mudah serta cepat,” katanya.

JBPM buat persiapan hadapi Ribut Siklon

PUTRAJAYA 4 Jan. - Jabatan Bomba dan Penyelamat Malaysia (JBPM) telah membuat persiapan yang sewajarnya untuk menghulurkan bantuan kecemasan di Pahang, Terengganu dan Kelantan yang dilanda ribut tropika Pabuk.

Jabatan itu dalam kenyataannya berkata, semua negeri melalui Pusat Gerakan Operasi (PGO) juga diarahkan supaya memantau kesiapsiagaan anggota dan aset jabatan termasuk kenderaan darat, air dan udara dalam keadaan baik.

“Selain itu, aset JBPM termasuk kenderaan darat, air dan udara itu juga perlu dilletakkan di kawasan yang strategik bagi memudahkan pergerakan apabila berlakunya sebarang kecemasan,” kata jabatan itu dalam kenyataan di sini hari ini.

Selain itu, JBPM juga telah mengarahkan balai-balai untuk membuat pemantauan dan rondaan di kawasan pesisir pantai bagi memastikan keadaan sekitar selamat dan tindakan operasi menyelamat dapat berjalan dengan lancar dan pantas.

“JBPM juga telah menga-

rahkan pegawai kanan di ibu pejabat jabatan di Putrajaya untuk bertugas secara ‘stand-by 24 jam’ di Pusat Pengurusan Operasi (PPO) bermula Rabu lalu sehingga hari ini untuk memantau keadaan semasa ribut tersebut.

“Mereka juga bertanggung-jawab untuk menguruskan bantuan kecemasan melibatkan anggota dan aset jabatan ke negeri-negeri yang terkesan dengan ribut tropika Pabuk,” katanya.

Jabatan Meteorologi Malaysia sebelum ini telah mengeluarkan amaran waspada tahap kuning bagi kawasan pantai timur, negeri-negeri berkenaan akan menerima hujan lebat dan angin kencang pada kelajuan 40 kilometer (km) setiap jam.

Kawasan perairan berhampiran Kelantan dan Terengganu juga dijangka menerima angin selaju 50-60 km sejam dengan ombak setinggi 4.5 meter, kelajuan itu boleh menyebabkan kerosakan struktur bangunan terutama rumah-rumah di pesisiran pantai, risiko pokok tumbang dan banjir kilat di kawasan yang terlibat.

Lynas appeals against ministry order

Firm invokes legal right to challenge govt directive on transporting residue abroad

KUANTAN: Lynas Malaysia is appealing against the Energy, Science, Technology, Environment and Climate Change Ministry's decision to have the company remove its residue from the country.

The rare earth material producer said that this move was in line with the Atomic Energy Licensing Act in relation to the decision conveyed in a letter from the Atomic Energy Licensing Board deputy director

dated Dec 4, 2018.

The Act provides for anyone dissatisfied with the decision of the appropriate authority to give notice of appeal within 30 days after being notified of the decision.

"Our preferred course of action remains to resolve these issues through our ongoing discussions with the Malaysian government.

"However, the statute in Malaysia requires that an appeal must be filed within 30 days, otherwise we

may lose some rights of appeal.

"The statute requires that this initial appeal is lodged with the minister," Lynas chief executive officer Amanda Lacaze said in a statement.

She said that key issues in relation to the new condition included the availability of regulatory approvals, the proposed timetable for export of water leach purification (WLP) residue and the significant cost.

"We look forward to continued

discussions with the Malaysian government to resolve these issues. The appeal has been filed to preserve our legal rights while those discussions are ongoing," said Lacaze.

Following an executive review on Lynas' operations in November last year, the ministry decided to impose a new condition that requires the export of WLP residue from Malaysia.

The new condition would be applied to Lynas Malaysia's future

licences or permission renewals.

This was in spite of the review committee's recommendation for Lynas to immediately identify and build a permanent disposal facility for the WLP residue.

Lynas' operating licence is due on Sept 2.

On another matter, Lynas said it was continuing to operate on a business-as-usual basis and production has recommenced following a temporary halt last month.

Nelayan Melaka boleh turun laut

Melaka: Melaka tidak terjejas dengan kesan ribut tropika Pabuk yang mengancam negeri di pantai timur walaupun beberapa kawasan turut dilaporkan menerima kesan angin kencang yang luar biasa.

Pengarah Jabatan Meteorologi Malaysia (MetMalaysia) negeri Nasrul Hakim Hashim berkata, setakat ini semua aktiviti

di laut termasuk kumpulan nelayan boleh berjalan seperti biasa berikutan tiada kesan langsung terhadap fenomena angin kencang sejak Rabu lalu.

“Boleh dikatakan Melaka tiada kesan langsung terhadap ribut tropika Pabuk ini yang sedikit terkena tempias di negeri sebelah Pantai Timur Semenanjung.

“Kecuali, ribut yang

membawa angin kencang ini menuju ke arah Mersing, Johor, ia berkemungkinan. Faktor Banjaran Titiwangsa juga antara benteng yang menghalang kebanyakan angin dari Laut China Selatan pada monsun timur laut,” katanya ketika ditemui di pejabatnya di sini, semalam.

PENANGAN PABUK

JAUHI PANTAI

Ribut tropika dijangka landa Langkawi hari ini

Zuliaty Zulkifli
cnews@NSTP.com.my

Alor Setar

Kawasan utara negeri ini terutamanya di Pulau Langkawi dijangka menerima tempias ribut tropika Pabuk hari ini.

Pengarah Angkatan Pertahanan Awam Malaysia (APM) Kedah, Lefetenan Kolonel (PA) Awang Askandar Ampuan Yaacob berkata, berdasarkan ramalan Jabatan Meteorologi Malaysia (MetMalaysia), ribut itu dijangka melanda Pulau Langkawi bermula jam 2 petang.

Beliau berkata, sehubu-

ngan itu, semua penduduk dan pelancong di Langkawi dinasihat menjauhi kawasan pantai bagi mengelak kemungkinan buruk.

"Ombak dijangka tinggi esok (hari ini) dan aktiviti membaikkan bot kecil, rekreasi dan menangkap ikan tidak dilakukan.

"Anggota APM akan melakukan tinjauan di empat menara pantai iaitu di Pantai Chenang, Pulau Payar dan Pantai Pantai selain satu di Kuala Muda bagi memastikan keselamatan awam," katanya, semalam.

Awang Askandar berkata, kesan ribut itu dijangka menyebabkan pokok tumpong dan angin kencang yang boleh mengancam keselamatan orang ramai.

"Oleh itu, kami nasihati orang ramai supaya sentiasa berhati-hati terutama mereka yang tinggal di tepi laut," katanya.

Maklumat lanjut boleh menghubungi Pusat Kawalan Operasi Daerah (PKOD) di talian 04-9663309 (Langkawi) dan 04-4235682 (Kuala Muda).

Kereta dihempap pokok tumbang

Kuala Terengganu: "Ini kali pertama saya meletakkan kereta berhampiran pokok dan tak sangka pulak terjadi insiden kereta dihempap pokok tumbang," kata Dr Abd Halim Abd Manan, 26, selepas kereta Perodua Myvi miliknya dihempap pokok di Pantai Batu Buruk di sini, semalam.

Dr Abd Halim yang bertugas di Jabatan Obstetrik dan Ginekologi (O&G) Hospital Sultanah Nur Zahirah (HSNZ) di sini, berkata beliau meletakkan keretanya berhampiran pokok rhu berkenaan kira-kira jam 6.40 pagi kerana parkir dalam dan luar hospital itu penuh.

"Saya masuk kerja jam 7 pagi. Ketika lakukan rondaan di wad kira-kira jam 9.30 pagi, jururawat datang beritahu kereta saya dihempap pokok.

Gotong-royong selamatkan bot

Di Kuala Nerus, sekumpulan nelayan di Kampung Kolam bergotong-royong menyelamatkan bot gentian kaca masing-masing di persisiran Pantai Mengabang Telipot bagi mengelakkan kerosakan atau dihantarkan ombak besar.

Tinjauan mendapati lebih 20 nelayan bekerjasama mengalihkan bot gentian kaca ke + kawasan yang lebih tinggi.

Rozl Husin, 48, berkata, kehadiran ribut Pabuk memburukkan lagi keadaan di kawasan pantai.

Azmi Hamid, 50, berkata, sebelum ini air pasang besar dan ribut yang berlaku secara tiba-tiba kerap menghantarkan bot gentian kaca yang diletakkan di tepi pantai membuatkan nelayan serik dan sentiasa berwaspada.

Pengarah Angkatan Pertahanan Awam Malaysia (APM) Terengganu, Lef Kol (PA) Che Adam A Rahman berkata, amaran berjaga-jaga berikutnya ribut Tropika Pabuk sudah ditamatkan jam 10 pagi semalam selepas keadaan cuaca semakin baik.

"Bagaimanapun segala aktiviti di kawasan pantai dan laut diminta ditangguhkan terlebih dahulu sehingga keadaan cuaca pulih sepenuhnya.

Di Bachok, kira-kira 1,200 nelayan daerah itu terpaksa 'mengikat perut' apabila sudah seminggu tidak turun ke laut akibat ancaman ribut tropika siklon Pabuk.

Pengerusi Persatuan Nelayan Kawasan Bachok, Mohd Saripudin Isahak berkata, nelayan tidak keluar ke laut kerana berjaga-jaga selepas amaran dikeluarkan **Jabatan Meteorologi**.

Katanya, kebiasaannya, mereka mampu meraih hasil tangkapan sekitar RM2,000 ke RM3,000 seminggu.

"Nelayan terpaksa menggunakan simpanan yang mereka ada apatah lagi perbelanjaan diperlukan bagi anak-anak memasuki sesi persekolahan dan urusan harian keluarga, namun keselamatan diri harus diutamakan," katanya.

Di Tumpat, keadaan ombak di Pantai Getting disini masih tinggi walaupun cuaca agak baik selepas ribut tropikal Pabuk membadi beberapa kawasan di negeri ini sejak semalam.

Tinjauan mendapati ombak masih tinggi membadi pantai yang membahayakan untuk aktiviti laut.

MPOB terima IKM Laboratory Excellence Platinum Award

Oleh Hajar Musa

hajar@mpob.gov.my

Kuala Lumpur: Makmal Perkhidmatan Analitikal Oleokimia, Lembaga Minyak Sawit Malaysia (MPOB) menerima anugerah IKM Laboratory Excellence Platinum Award daripada Institut Kimia Malaysia (IKM) pada awal Disember lalu, di sini.

Anugerah ini adalah penghargaan kepada makmal yang berjaya mengekalkan anugerah IKM Excellence Award selama 20 tahun berturut-turut sejak tahun 1999.

Penyampaian anugerah disempurnakan Timbalan Menteri Tenaga, Sains, Teknologi, Alam Seki-

tar dan Perubahan iklim, Isnaraissah Munirah Majilis.

IKM Excellence Award adalah anugerah tahunan dan diberikan kepada makmal di Malaysia yang memberi perkhidmatan berkualiti, cekap serta mematuhi peraturan dalam menjaga aspek keselamatan dan kesihatan pekerjaan di tempat kerja.

Ikut keperluan standard

MS ISO/IEC 17025:2005

Makmal berkaitan dinilai dari segi pengamalan sistem pengurusan kualiti mengikut keperluan standard MS ISO/IEC 17025:2005.

Dengan sokongan dan komitmen pihak pengurusan MPOB serta kecekapan kakitangan, Makmal

PRESENTATION OF IKM AWARDS

GUEST OF HONOUR
YB ISNARAISAH MUNIRAH MAJILIS
DEPUTY MINISTER FOR SCIENCE,
ENVIRONMENT AND CLIMATE CHANGE

Pegawai Penyelidik Fadzina Abdullah mewakili MPOB menerima anugerah IKM daripada Isnaraissah Munirah Majilis.

Perkhidmatan Analitikal ini juga pernah menerima anugerah IKM Excellence Silver Award pada tahun 2009 dan anugerah IKM Excellence Gold Award pada tahun 2013.

Perhatian terperinci dan teliti diberi terhadap penjagaan dan penyediaan sampel yang akan diuji membolehkan MPOB menerima

anugerah terbabit.

Keputusan ujian dipastikan boleh diterima pakai dalam menjamin pematuhan kepada peraturan ketat makmal berkenaan.

Berdasarkan keperluan keselamatan dan kesihatan yang digariskan oleh IKM, makmal perlu mempunyai kemudahan serta beroperasi

dengan jaminan keselamatan yang baik.

Kakitanan perlu mematuhi garis panduan keselamatan, penggunaan peralatan perlindungan keselamatan.

Penggunaan bahan kimia dan pengurusan sisa bahan kimia dapat dikelola dengan baik.

Inovasi rawatan pergigian untuk pesakit kurang upaya

→ Kaedah Stance Wheel mudahkan prosedur, beri keselesaan

Oleh Osman Lisut
manlee@bh.com.my

Aduan pesakit orang kelainan upaya (OKU) yang mendakwa kurang selesa setiap kali mendapatkan rawatan memberi inspirasi Bahagian Kesihatan Pergigian Perlis untuk mencipta sesuatu bagi menangani.

Mendapat sokongan Majlis Reka-bentuk Malaysia (MRM) bersama Kementerian Tenaga Sains, Teknologi, Alam Sekitar dan Perubahan Iklim (MESTECC), terhasillah Stance Wheel.

Stance Wheel, peralatan inovatif direka khas untuk pesakit berkerusi roda. Prosedur boleh dilakukan secara langsung dengan keselaman pesakit.

Jika sebelum ini, pesakit terpaksa dipindahkan daripada kerusi roda ke kerusi rawatan pergigian yang memerlukan dua atau lebih kaki tangan untuk melukannya, tetapi kini tidak lagi.

Kini kerusi roda akan diikat pada Stance Wheel bagi mengekalkan kedudukannya. Begitu juga pesakit dipaksaikan tali pinggang keselamatan supaya ia tidak bergerak ketika

Dr Boon Chye mencuba kerusi roda selepas merasmikan majlis pelancaran pengkomersialan produk inovasi Stance Wheel sambil diiringi Ketua Setiausaha Kementerian Kesihatan, Datuk Seri Dr Chen Chaw Min.

prosedur dilakukan.

Menariknya, Stance Wheel boleh dilaraskan sehingga 45 derjah, iaitu kedudukan sebenar pesakit gigi menerima rawatan. Namun, ia boleh dicadangkan maksimum sehingga 75 derjah.

Terdapat pelapik kusyen bagi memastikan keselasaan kepada dan belakang pesakit ketika kedudukan baring.

Berat peralatan kesihatan mudah alih ini adalah 60 kilogram (kg) dan boleh menampung beban maksimum 195kg. Panjangnya 69.6 sentimeter (cm), lebar 69.2 cm dan tinggi 96.3 cm.

Produk diiktiraf
Stance Wheel dipatenkan sebagai peralatan kesihatan mengikut Akta Peranti Kesihatan 2012 dan diiktiraf Kementerian Kesihatan Malaysia (KKM) bertempoh lima tahun.

Sementara itu, Timbalan Menteri Kesihatan, Dr Lee Boon Chye, berkata sehingga kini 10 unit Stance Wheel ditempatkan di semua klinik

pergigian di Perlis, manakala satu di Hospital Kajang.

"Inovasi ini memudahkan golongan berkerusi roda mendapatkan rawatan di klinik pergigian dan beberapa kali meraih kejayaan dalam peringkat negeri maupun kementerian."

"Diumumkan sebagai johan kategori Teknikal pada Konvensyen Kumpulan Kreatif dan Inovatif (KIK-KKM) peringkat kebangsaan pada 2015, mewakili kementerian pada Majlis Persada Inovasi Perkhidmatan Awam peringkat kebangsaan pada tahun yang sama.

"Projek ini juga terpilih Indikator Prestasi Petunjuk (KPI) Tahun Pengkomersialan Malaysia pada 2016. Kemuncaknya apabila perjanjian pengkomersialan dimeterai bersama Medical Apparatus Supplies Sdn Bhd (MASSB) Jun tahun lalu," katanya.

Bagi Pengarah Urusan MASSB, Md Azar Ismail, pihaknya menyatakan 2,000 unit Stance Wheel dieluarkan pada 2019 untuk pasaran tempatan dan luar negara.

Beliau berkata, kerjasama MASSB-KKM, membolehkan kemudahan ini ditempatkan di semua klinik pergigian kerajaan di seluruh negara, selain diantar sampel ke persatuan pergigian bagi tujuan ujian.

"Untuk pasaran luar negara, Dubai antara yang berminal bagi mendapatkan peralatan perubatan dan kami akan ke sana tahun depan bagi memeterai perjanjian," katanya.

YELLOW-STAGE WARNING

NORTHERN STATES ON ALERT

Perlis, Kedah, Penang brace for strong winds, heavy rain as tropical storm Pabuk heads for Thailand

ADIB POVERA
AND BEATRICE NITA JAY
KUALA LUMPUR
cnews@NSTP.com.my

STATES in the peninsula's northern region are bracing for strong winds and heavy rain as the tropical storm Pabuk leaves the east coast and heads towards Thailand.

The Meteorological Department director-general Alui Bahari said a yellow-stage warning had been raised for Perlis, Kedah and Penang.

He said heavy rain was expected in the three states as the storm crossed Segenting Kra to the Andaman sea.

He said a similar warning was issued for Hulu Perak, Kerian, Larut, Matang and Selama in Perak.

The yellow-stage warning was

Fishermen pushing a boat ashore in Kuala Nerus, Terengganu, yesterday. PIC BY IMRAN MAKHZAN

an indicator of heavy rains to come in one or two days.

As the storm heads towards the Andaman sea, it will trigger heavy rainfall in states in the peninsula's northern region.

Strong winds of more than 40kph are expected in these

states, causing damage to unstable structures, as well as triggering risks of falling trees."

The advisory was initially issued on Thursday and would be enforced until today for the affected states.

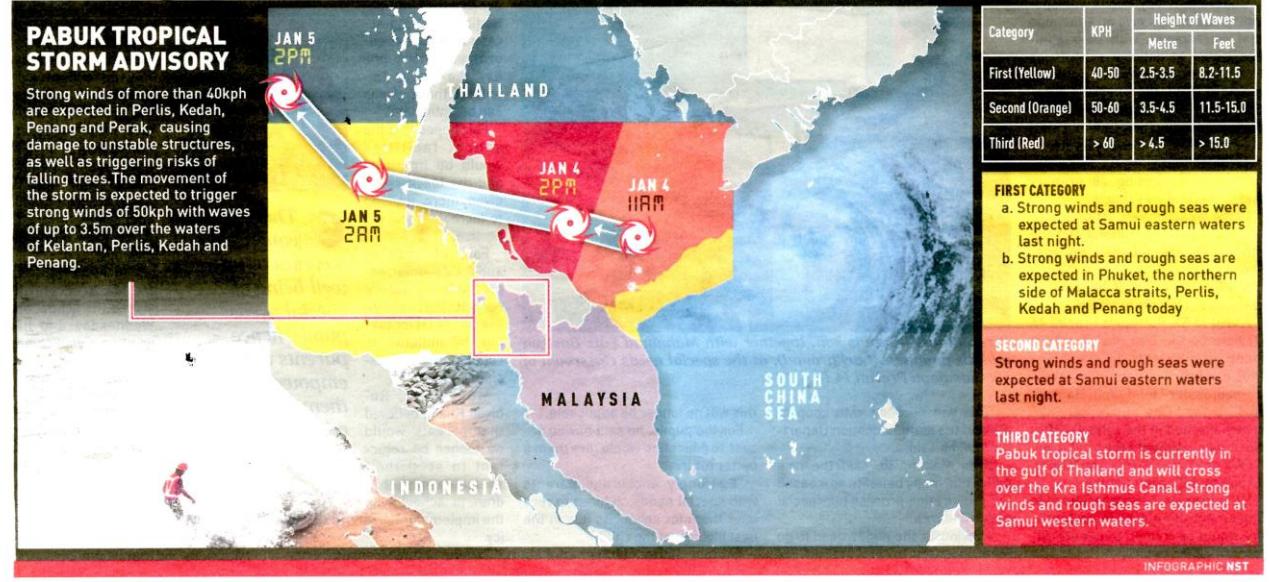

Up to 3pm yesterday, Alui said

the tropical storm was moving closer to Segenting Kra with a speed of 20kph.

The tropical storm is 239km from Arau (Perlis) and 288km from Kota Baru (Kelantan).

"The movement of the storm is expected to trigger strong winds

of 50kph, with waves of up to 3.5m expected to hit the waters off Kelantan, Perlis, Kedah and Penang. The condition of strong winds and rough seas is dangerous to all shipping and coastal activities, including fishing, ferry services and oil rigs."

Penduduk cemas amaran Ribuk

• Aktiviti pantai di lokasi tumpuan pelancong tak dibenar elak tragedi

Oleh Petah Wazan Iskandar, Suzalina Halid, Fazirkamarudin dan Zulatty Zukiffi
cnews@instp.com.my

► Langawi

Penduduk pulau ini cemas sebalas, sussulan amaran ribut tropika Ribuk yang diramal melanda kawasan itu mulai jam 2 petang.

Amaran itu dikeluarkan Pengarah Angatan Pertahanan Awam Malaysia (APM) Kelab, Left. Kol (PA) Awang Asikdar Aapuan Yaacob, yang menerima laporan Jabatan Meteorologi Malaysia (MetMalaysia).

Berikutnya itu, semua aktiviti pantai di lokasi tumpuan pelancong di Partai Chenang dan Pantai Teluk Tengah tidak dibenarkan mulai jam 11 pagi semalam, bagi mengelak perkara tidak diingini berlaku.

Pada masa sama, Persatuan Pelancongan Langkawi (PLTA) turut membatalkan semua aktiviti lawatan pulau (islands hopping) ke Pulau

Duyung Bunting bagi 450 pelancong yang sudah membuat tempahan, sehingga keadaan cuaca kembali puat.

Dilaporkan juga, seramai 186 penunggang negara dan sepasang feri yang

sepautnya membawa mereka ke Langkawi pada jam 1.30 tengah hari semalam dibatalkan sussulan amaran ribut.

Bagaimanapun, Pejabat Meteo-

ologi Pulau Pinang petang semalam,

memraklumkan ribut tropika Ribuk tidak akan membulat Pulau Langkawi secara terus sehingga pulau perlunguan tersebut hanya akan meremaja semasa hujan akan menuai kerana sainsampan.

Jarak 200 kilometer

Pengangguran, Lang Leong Kwock, ber-

kata ini kerana kedudukan angin ribut berada pada jarak 200 kilo-

meter (km) ke utara, sehala gus mus-

tah bagai ia membadi Langkawi.

Sehubungan itu, belum berkata,

penduduk dan pelancong di Lang-

kawi tidak perlu panik dengan ke-

adaan itu, namun mereka per-

lu bertindak selamat angin kuat dan

hujan, kesan daripada pengairan ri-

hati itu.

Selain itu, belum berkata,

ribut tropika Ribuk yang

diramal melanda kawasan itu mulai jam 2 petang.

"Jadi ia tidak akan membadi

Langkawi kerana pulau itu berasa di kawasan pinggiran ribut

Ribuk kerana kedudukan angin ini berada 200 km ke sebelah utara, jauh

untuk ia membadi Langkawi," katanya.

"Jadi penduduk dan pelancong di

Langkawi perlu berterang," katanya

ketika diluhung NSTP di sini, se-

malam.

Semata-mata, penduduk di Lang-

kawi boleh petang semalam, men-

dapat penduduk kembali melaku-

kan aktiviti seperti biasa.

Pengusaha batik dikenali sebagai

Ramli, 34, berkata dia barasi lepas

datang ke pulau sebaik ketarla mem-

bukt latwan pulau selama empat

jam.

"Sayu memang tahu mengenal

angin Ribuk tetapi kerana sini

buas salua dan angin mengiring

dan laut bergejora. Ia perkara biasa

cuma bezaya kali ini angin kuat

tetapi ia tidak jaya aktiviti yang

dijalankan," katanya ditemui di Pe-

nari, Kuala.

"Saya memaham tujuan amaran

ribut Ribuk tetapi kerana sini

buas salua dan angin mengiring

dan laut bergejora. Ia perkara biasa

cuma bezaya kali ini angin kuat

tetapi ia tidak jaya aktiviti yang

dijalankan," katanya ditemui di Pe-

PROGRESS

HIGH TECH AND CHOCs

Promote use of biotech as catalyst for genetic diversification

ZAKRI ABDUL HAMID

EVEN if they possess an abundance of natural resources, developing countries like Malaysia will forever play second fiddle to developed countries if they lack mastery of science and technology.

A case in point: a recent news report from the United States describing how the candy giant Mars, makers of the Snickers brand bar, M&M's and other popular chocolate products, secured the services of a biotech company to help breed a cacao tree resilient to the growing threats of climate change and disease.

It is an intriguing development well worth noting in Malaysia.

Howard Shapiro, the chief agricultural officer for Mars, was quoted as saying that 40 per cent of the world's cacao crop is lost each year to fungal, viral, and pest problems.

The biotech firm will equip the Mars' company cacao experts with software that will help tap into the cacao tree's natural genetic diversity and analyse how to rapidly find genetic lines that are more able to cope with unfavourable growing conditions.

The approach can shave years off the development process, simulating offspring and using machine learning to predict their quality. Combined with other advances like gene editing and sequencing, high technology is creating new agricultural opportunities.

Other crops hit by disease or other threats include bananas, papayas, and oranges – all grown largely in monocultures. As one

expert said: "We've got to get deliberate about tapping into that natural genetic diversity."

The article points up the need for a critical introspection in Malaysia on the use of biotech as a catalyst for much-needed genetic diversification. This has got to be one of the main missions of the Malaysian Bioeconomy Development Corporation in the era of a New Malaysia. The same goes for the Malaysian Industry-Government Group for High Technology as far as areas in high technology are concerned. It is about future-proofing the nation amid the rapid technological advances taking place around us.

In the Fourth Industrial Revolution, big data and artificial intelligence are among many technological developments that will hold sway. It is wise, therefore, to look out for these advances which may have an impact on our livelihood in the future.

We have been playing catch-up with the developed countries for far too long. We need to review our plans and reassess how we want to move forward, mobilising the myriad sources of human talent present in our multi-cultural midst and preparing our younger generation to face the challenges of the future.

There are already successful role models. Malaysians making their presence felt on the global stage include, for example, Tan Sri Lim Wee Chai, the executive chairman and founder of Top Glove Corporation Bhd, the company that controls 25 per cent of the world market for rubber gloves. He was once quoted as saying, Malaysia "must speed up a move to more value-added production".

While the country has shifted focus – from tin and rubber industries that were the bedrock of the colonial economy to the electronics factories and palm oil plantations of today – the transformation needs to go further, he says. He has also proposed building "more chocolate factories rather than more cocoa plantations". An ardent advocate of research and development (R&D), Lim employs about 120 researchers in-house, believing in the simple adage of "no research, no future".

Smaller and cheaper-cost rivals in the region, like Vietnam, are reducing the competitive advantage of Malaysian manufacturers and becoming bigger contenders for foreign investment. Our companies are still too labour intensive, productivity's low, and mechanisation rates trail Thailand and Singapore.

We need to continue the growth of investments in our educational system in science, technology, engineering and mathematics (STEM) while not neglecting the social sciences and humanities, producing more high-quality university graduates that are industry-ready, spending more on R&D, and improving our governance structure in science if we are serious about not getting stuck in the "middle income quagmire".

Malaysia doesn't grow much cocoa, but it has become the continent's No. 2 processor by grinding beans imported from Indonesia.

Malaysia has 51 chocolate manufacturers and confectioneries and 194 local chocolate producers, selling about RM1.1 billion a year. In comparison, the cocoa it cultivated last year was valued at US\$5 million when calculated using average futures prices for 2016.

In the 2018 Global Competitive Report released last October by the World Economic Forum, Malaysia rose one notch to the 25th spot out of 140 countries surveyed. Malaysia was one of the only three non-high-income economies featured in the Top 40. The other two were China (28th) and Thailand (38th).

As we start the new year, let us hope for Malaysia's continued progress towards advanced nation status, characterised by a workforce well-educated in the sciences and the humanities, drawing strength from our diverse ethnic composition and able to create value-added products in an increasingly competitive world economy.

The writer, a distinguished fellow of the Washington D.C.-based Global Federation of Competitiveness Council, is former director of the United Nations University's Institute of Advanced Studies in Tokyo

THE STAR (VIEWS): MUKA SURAT 20
TARIKH: 7 JANUARI 2019 (ISNIN)

Authorities must walk the talk

IN many areas in Selangor and Kuala Lumpur, big plastic bags are being used to hold twigs, leaves and other garden refuse before they are collected for disposal.

What baffles me and, I'm sure, many citizens, is the fact that these plastic bags are actually being used by contractors who have been given the task of clearing roadsides and dividers of such debris.

Every time I see these plastic bags, I wonder why they are being used when single-use plastic bags have already been banned.

I believe that it sends the wrong message to the public that it is still all right to use such plastic bags although there are various biodegradable and environmentally friendly alternatives.

The local authorities must walk the talk when dealing with single-use plastic bags. This is important since the government is working hard to educate the public and raise awareness of the danger of plastic pollution.

In May last year, Housing and Local Government Minister Zuraida Kamaruddin said it would take at least a year to educate the public before the government could introduce a nationwide ban on plastic bags.

Zuraida was quoted in the media as saying that the awareness level is still low, despite bans already being enforced in many states and territories, including Penang, Kuala Lumpur, Putrajaya, Selangor, Melaka and Johor.

Penang, which was the first state in Malaysia to initiate the "No free plastic bags" campaign in July 2009, has also planned to increase the charge for each plastic bag from 20 sen to 50 sen to help encourage the public to use reusable

ble bags. Other states like Selangor have followed suit.

The rampant use of plastic bags by landscaping and garbage collecting firms until today reflects the attitude of Malaysians who want everything to be easy instead of finding a better solution, such as using bamboo baskets that can be reused many times (apart from also being biodegradable).

In the federal government's Roadmap Towards Zero Single-use Plastics 2018-2030 announced in October 2018, it was revealed that Malaysia is a global player in the plastics industry with currently about 1,300 plastics manufacturers.

As at 2016, our exports amounted to RM30bil, which saw 2.26 million metric tonnes of resin utilised to produce plastics.

The roadmap also exposed that environmental problems related to plastic waste have become a major problem in Malaysia, which has been ranked as eighth among the top 10 countries with mismanaged plastic waste in the world.

A study estimated that Malaysia has produced 0.94 million tonnes of mismanaged plastic waste, of which 0.14 to 0.37 million tonnes may have been washed into the oceans.

Plastic pollution is now a global problem and must be addressed in

a sustainable manner by balancing economic growth with environmental protection, in line with the United Nation's Sustainable Development Goals, which Malaysia subscribes to.

It is important to note that more than 60 countries have already introduced some measures to curb single-use plastic waste, such as imposing bans and levies.

We must support the government's plans to address single-use plastics by encouraging the plastics industry to produce eco-friendly products. It will ensure the industry will adopt green technologies while safeguarding the environment.

The roadmap prepared by the

Energy, Science, Technology, Environment and Climate Change Ministry should be used as a guide towards zero single-use plastics in Malaysia in a holistic manner.

Under the roadmap, Malaysia will eliminate single-use plastics by 2030. Although some quarters have expressed concerns that the 12-year timeline is simply too long to be effective, it actually covers all aspects, including offering suggestions to plastic manufacturers on how they can transition to alternatives and preparing them to produce more eco-friendly products.

The success of this comprehensive roadmap depends on support from all stakeholders, namely the state governments, manufacturers, suppliers, business operators, non-governmental organisations and the public.

We may reach the target earlier than 2030 if all parties play their roles responsibly. This includes discarding lackadaisical attitudes that prompt us to take the easy way out by continuing the use of single-use plastic bags.

I hope all government agencies and their contractors, at the very least, will from now on find a better alternative to single-use plastic bags. We must look for environmentally friendly products to help us achieve the target sooner than expected.

Government agencies and the local authorities must lead by example to help reduce plastic pollution including banning the use of plastic bags at all levels – including by their own contractors – and not only among shoppers.

Kastam perlu kenal pasti sisa plastik import

BUKIT MERTAJAM – Kementerian Perumahan dan Kerajaan Tempatan (KPKT) mahu Jabatan Kastam Diraja Malaysia (JKDM) membuat pemeriksaan lebih teliti bagi memastikan setiap kontena yang membawa sisa plastik ke dalam negara mematuhi prosedur serta peraturan baharu berkaitan sisa plastik yang ditetapkan kementerian.

Menterinya, Zuraida Kamaruddin berkata, pihaknya akan memberikan taklimat dan meningkatkan aspek pengenalan bahan plastik kepada pihak JKDM bagi membolehkan mereka mengenal pasti sisa plastik yang diimport masuk.

“KPKT melaksanakan beberapa syarat dan peraturan baharu berhubung import sisa plastik, jadi saya mahu pihak JKDM membuat pemeriksaan lebih teliti selepas ini bagi memastikan pengimpor mematuhi syarat ditetapkan.

“Macam siasatan kami dalam kes penemuan 175 kontena penuh berisi dengan bahan buangan plastik yang tidak diisyihar dan tidak mendapat permit import (AP) KPKT tersangkut di Terminal Kontena, Pelabuhan Pulau Pinang pada November lepas, yang mendapat pengimpor tidak bertanggungjawab

ZURAIDA mendengar penjelasan staf mengenai sisa plastik ketika melakukan tinjauan di kilang UDA Materials Sdn. Bhd. di Bukit Mertajam semalam.

membuat deklarasi palsu berhubung bahan yang dibawa masuk bagi mengelak ditahan pihak berkuasa,” katanya.

Beliau berkata demikian ketika membuat lawatan ke pusat pemprosesan sisa plastik di UDA Materials Sdn. Bhd. di

sini semalam.

Katanya, semua kontena yang masih belum dituntut itu kini terkandas di situ dan pihaknya mengambil tindakan menghantar semula ke negara asal.

Govt looking at grading system for plastic waste industry

BUKIT MERTAJAM: The government will look into developing a grading system for facilities processing plastic waste to better regulate the industry, says Housing and Local Government Minister Zuraida Kamaruddin.

She said factories which import clean plastic and process them directly without cleaning them would be given a first-class grade.

"Under the new ruling, the factories can only import plastic waste from advanced countries such as those in Europe, from the United States, Japan and Australia.

Zuraida Kamaruddin ——————
The data will be collected for future development of the industry. Under the new regulation, we put a fee of RM50 per tonne.

"The grading will also look into whether the factories and facilities are capable of matching their capacity," she told on Saturday.

Zuraida said the grading is meant to encourage the factories to bring in clean plastic as dirty plastic can cause environmental pollution.

She said that out of 58 companies whose approved permits were frozen last July, only eight complied with the regulations and were allowed to resume operations.

Zuraida, who earlier visited two factories in Kedah and three factories in Penang, said the ministry was looking into the industry holistically to ensure they comply with the guidelines.

"There will be more info by the factories such as where their products would be exported to and a fee to be imposed for imported plastic waste. The data will be collected for future development of the industry. Under the new regulation, we put a fee of RM50 per tonne," she said.

In July last year, the ministry revoked the permit on plastic waste imports, affecting 114 legal plastic waste factories all over Malaysia for three months up to Oct 23.

The move was made after reports of serious pollution in Kuala Langat, Selangor, which was allegedly caused by factories processing plastic waste.

Larang guna straw demi manfaat masa hadapan

SAUDARA PENGARANG,

BULAN ini bermula lalang larangan penggunaan straw plastik di semua kedai makan di Wilayah Persekutuan Kuala Lumpur, Putrajaya dan Labuan.

Idea melarang penggunaan bahan plastik tersebut hangat diperkatakan netizen di awal pengumumannya.

Ramai yang menyokong namun tidak kurang juga mencemuh dengan memuat naik pelbagai gambar dan *troll* berkenaan isu tersebut.

Biar pun isu larangan penggunaan straw plastik telah sunyi dalam kalangan orang ramai, namun perlaksanaannya tetap diteruskan di tiga kawasan tersebut.

Tiga wilayah yang disenaraikan akan menjadi kayu ukur terhadap keberkesanan dasar yang telah dilaksanakan.

Namun kerajaan tetap perlu melaksanakan kajian yang menyeluruh berkaitan larangan tersebut.

Antaranya aspek penawaran alternatif straw plastik daripada sumber tumbuhan sebagaimana yang telah dicadangkan.

Adakah pengeluarannya mencukupi untuk permintaan di dalam jangka masa panjang?

Dalam pada itu, bagi kita yang gemar menikmati hidangan di kedai, larangan penggunaan straw plastik akan terkesan di jiwa.

Manapun jika dilihat dari sudut sejarah, penggunaan straw pada zaman dahulu tidaklah ketara, malah mungkin tiada.

Mereka hanya meneguk air dari cawan dan gelas. Kaedahnya sungguh mudah. Besar kemungkinan mereka hanya minum minuman panas dan suam.

Dan ia pula disediakan isteri di rumah dan bukan diminum di kedai.

Namun kini, apabila berganti zaman dengan kehidupan moden, straw menjadi pilihan kerana kita berada di dalam ruang dan situasi

yang berbeza.

Kebanyakan kita menjadikan warung dan kedai mamak sebagai destinasi wajib setiap hari.

Oleh itu, kita tidak boleh elak daripada menggunakan gelas yang telah digunakan oleh pelanggan sebelumnya.

Maka meneguk air daripada gelas yang telah digunakan oleh pelanggan lain mungkin agak menjengkelkan, namun dengan adanya straw ia menjadi lebih praktikal.

Bagaimanapun, penggunaan straw plastik memberi kesan negatif kepada alam sekitar.

Ini kerana straw yang telah digunakan akan bercampur bersama sisa makanan dan sampah termasuk bahan plastik yang lain apabila ia dibuang.

Sampah yang tidak diurus dengan baik dan tidak dikitar semula akan menjadi ancaman kepada alam sekitar dalam jangka masa panjang.

Walaupun straw dihasilkan daripada bahan plastik *thermo* yang mudah dicairkan dan dibentuk semula, namun adakah kita sudah bersedia dengan kaedah untuk mengitar semula penggunaan straw tersebut.

Adakah semua rakyat Malaysia boleh mengasingkan sisa-sisa pepejal di rumah sebelum membuangnya?

Malangnya ada yang masih tidak mengetahui dan tidak mengambil peduli akan isu ini.

Cadangan penggunaan straw mesra alam daripada bahan bukan plastik adalah sangat digalakkan,

Bahan boleh urai yang dihasilkan daripada tumbuhan seperti kertas, buluh dan jagung boleh dijadikan sebagai alternatif kepada straw plastik yang ada pada hari ini.

Rakyat pada amnya perlu memberi kerjasama rapat dengan mengambil tindakan progresif untuk menjaga alam sekitar bagi manfaat negara di masa hadapan.

Hanya 19 mohon permit AP

Syarikat proses plastik kitar semula perlu mohon semula

SITI ZUBAIDAH ZAKARAYA

SUNGAI PETANI

Hanya 19 permohonan baharu lesen import (AP) proses barang plastik kitar semula diterima daripada keseluruhan 114 syarikat seluruh negara.

Menteri Perumahan dan Kerajaan Tempatan, Zuraida Kamaruddin berkata, lesen itu dibuka sejak Julai 2018 dalam tempoh tiga bulan sebelum penambahan prosedur baharu dan beberapa

syarat ketat dilaksanakan. Katanya, daripada jumlah keseluruhan pemegang AP, hanya 54 sahaja aktif memproses plastik kitar semula, namun hasil pemeriksaan mendapat hanya lapan syarikat memenuhi kriteria ditetapkan.

"Kesemua 114 pemegang lesen AP ini kena mohon semula selepas kita bukukan.

"Setakat ini ada 19 yang memohon tetapi sebelum diluluskan, saya nak tengok kalau nampak operasi bertepatan dengan apa yang kita nak, saya akan luluskan kerana tidak mahu merugikan potensi industri kitar semula plastik ini, yang mana ia memberi pulangan menguntungkan kepada negara," katanya ketika pemeriksaan mengejut di sebuah kilang memproses plastik kitar semula di Kawasan Perusahaan

Pemeriksaan mengejut dilakukan di sebuah kilang yang menjalankan kegiatan memproses plastik kitar semula.

Sungai Petani, semalam.

Hadir sama, Ketua Pengarah Jabatan Pengurusan Sisa Pepejal, Ismail Mokhtar.

Zuraida berkata, Malaysia boleh menjadi pemain utama

kerana industri itu menyumbang RM30 bilion kepada pendapatan negara dan RM600 bilion di peringkat antarabangsa.

"Kalau kita buat dengan

baik, ia akan menjadi pendaftaran buat negara, cuma kena buat betul-betul.

"Masyarakat perlu faham antara plastik sampah dengan plastik kualiti yang kita

import, ia berbeza," katanya.

Sementara itu katanya, pemeriksaan ke atas kilang yang menjalankan kegiatan itu sejak setahun lalu mendapat, besar kemungkinan ia beroperasi tanpa kebenaran.

"Kita lihat memang ketara ada kerja memproses plastik yang tidak ada kebenaran, kerana mereka buka lesen dengan PBT, adalah bawah aktiviti berbezra.

"Kita difahamkan, syarikat ini beroperasi waktu malam tetapi malam ini tiada kerja dijalankan, dengan bantuan PBT kita dapat masuk. Kalau ikutkan pendaftaran memang kilang ini tidak mendaftar sebagai salah satu syarikat kita luluskan import plastik," katanya.

Beliau meminta PBT berbincang dengan pengusaha terbabit untuk tindakan selanjutnya.

MALAYSIAN atmospheric scientist Assoc Prof Dr Justin Sentian is in Antarctica in the Austral summer to carry out a climate and atmospheric science research project.

Dr Justin who is Universiti Malaysia Sabah (UMS) lecturer, is the first Malaysian scientist to collaborate with the Chinese Arctic and Antarctic Administration (CAA) in a research expedition at the Great Wall Station, Antarctica.

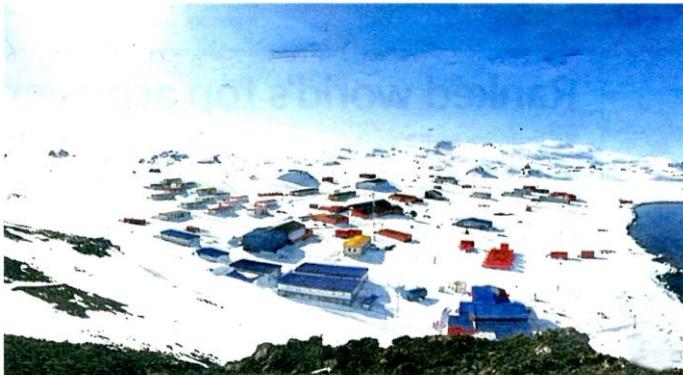

He left Malaysia and travelled to Punta Arenas in Chile on Dec 14 and arrived in King George Island, Antarctica four days later.

He will be at Wall Station for more than a month, and is expected to return to Malaysia by the end of January.

The main objective of the collaborative research expedition is to investigate the vertical stratospheric ozone transport in the polar region into the upper troposphere layer, commonly known as Stratosphere-Troposphere Exchange (STE).

In addition to the downward fluxes of ozone from the stratosphere into the troposphere, other factors affecting the tropospheric ozone chemistry will be investigated, such as climate change and the enhancement of other chemical constituents such as short-lived halogenated halocarbons.

UMS scientist in Antarctica

Dr Justin is conducting research at the Great Wall Station, Antarctica and is expected to return home at the end of January.

Sensitivity analyses could also provide a better insight into which of those factors are more important to the net production of tropospheric ozone.

He said the research output will enhance the understanding of the oxidation capacity status of the polar atmosphere under changing climate scenarios.

The potential sources of the halocarbon can also be determined and helps to understand the roles of these compounds in polar tropospheric chemistry. Tropospheric ozone, a secondary pollutant as well as an important greenhouse gas, is generally understood to be generated largely from photochemistry reactions.

However, a substantial amount of ozone has also been found to be transported from the stratosphere.

"This downward flux is not only a constituent of the main transport mechanism, but is also responsible for stratospheric ozone depletion and significant input of reactive species into the

tropospheric chemical system," he said.

In Antarctica, Dr Justin said it was found that ozone in the troposphere largely originates from the stratosphere through a variety of processes known as stratosphere-troposphere exchange (STE). However, he added that the investigation into the roles of future climate scenarios in STE and tropospheric ozone chemistry in the polar region remains relatively limited.

"This limited understanding of these combined effects on future tropospheric ozone in the polar region warrants a strategic research approach combining field measurements (meteorology, trace gases, vertical ozone profiles and halocarbons) and modelling (climate model, atmospheric chemistry and transport model).

"This Antarctic collaborative research aims to investigate the occurrence of the STE phenomenon and to characterise the tropopause and tropospheric ozone chemistry," he added.

Dr Justin said this research will significantly contribute to the global community's ongoing efforts towards understanding the potential sources and chemistry of tropospheric ozone under future climate scenarios.

Selected Sunway malls are giving out metal straws to shoppers to effect a little change which can hopefully go a long way.

'It's over, plastic!'

Mall gives out metal straws to encourage shoppers to go green

WE HAVE found a new love – with metal straws!

That was Sunway Malls' declaration as it started 2019 by saying "goodbye" to plastic straws.

In line with the Government's decision to ban plastic straws in the Federal Territories, Sunway Malls has introduced metal straws which can be redeemed from participating malls.

Its decision to "break up" with plastic straws is congruent with its pledge for a greener future.

Some of the tenants are also

doing away with plastic straws as well.

Aside from metal, biodegradable paper straws are available at Maison de Gigi, Caffe Bene Malaysia, Juicy Fresh Juice Bar, and The Coffee Bean & Tea Leaf.

Other shops such as Coffea Coffee, Chai Yó, Regiustea, NY Steak Shack, PappaRich, Sunny Queen, Ten Years, Madam Kwan's and Starbucks have also introduced sustainable options to replace plastic straws.

Some tenants have decided to remove plastic straws altogether while some are rewarding cus-

tomers who bring their own straws.

Shoppers simply need to spend RM100 in two receipts to be eligible to redeem their personal metal straws from the concierge counters of each mall.

The metal straws can be redeemed at Sunway Pyramid, Sunway Velocity Mall, Sunway Putra Mall and Sunway Carnival Mall.

"Out with the plastic, in with the metal! We are excited to introduce metal straws which will be available to shoppers with a very minimal spend

when they come to Sunway Malls," said Sunway Malls chief operation officer Kevin Tan.

"With metal straws, we hope to instil a greater sense of responsibility and sustainability towards the environment through a conscious effort of reducing daily plastic consumption in our shoppers lives.

"This is a part of our continuous effort for the betterment of the future and we hope our shoppers will also see the value in this campaign.

"A little change goes a long way."

Barely visible: People going about their daily work on a morning thick with smog on the outskirts of India's capital of New Delhi. — AP

Rain clears smog in New Delhi, but air quality still 'very poor'

NEW DELHI: A rainy spell brought better air to residents of New Delhi, giving them a brief respite from thick grey smog that has shrouded the Indian capital for the last two months, although air quality continued to be "very poor".

A measure of tiny, hazardous breathable particles known as PM 2.5 reached an average of 182 by noon yesterday, the Central Pollution Control Board said, its lowest since Nov 4.

But pollution was still five times more than a US government recommended level of 35 to stand at "unhealthy" levels, according to the US embassy.

"Change in weather conditions by rain or higher wind speed helps dissipate peak pollution, but we continue to need strong emergency actions such as shutting power plants," said Anumita Roychowdhury, an officer with the Centre for

Science and Environment think-tank.

The federal government air quality index rated Delhi's air quality "very poor" yesterday and had a similar forecast for Monday, urging people with respiratory and cardiac problems to avoid polluted areas and limit outdoor movement.

A sharp drop in temperatures and wind speed over the last two weeks, combined with vehicle and industrial emissions, dust from building sites and smoke from garbage burning has stoked pollution over much of north India.

Levels of PM 2.5 hit their highest last year at 450 on Dec 23.

Despite the pollution, there is little sign Delhi's residents are taking steps to protect themselves.

Activists say the apparent lack of concern gives politicians the cover they need for not tackling the issue adequately. — Reuters

Merapi muntahkan lahar 1.2 km

JAKARTA 5 Jan. – Gunung Merapi di Yogyakarta dan Jawa Tengah di Indonesia memuntahkan lahar dan debu, semalam hingga menyebabkan beberapa perkampungan di daerah Klaten diselubungi debu dari gunung tersebut.

Menurut Pusat Penyelidikan dan Pembangunan Teknologi Bencana Geologi (BPPTKG), gunung berapi itu mula menge luarkan lahar pada pukul 9.01 malam tadi waktu tempatan.

Katanya, pancutan lahar keluar kira-kira 150 saat dan turun sejauh 1.2 kilometer (km) dari puncak Merapi.

Perkampungan yang terjejas adalah di mukim Kemalang, di daerah Klaten yang terletak kira-kira lima kilometer dari Merapi.

Portal *Dream.co.id* melaporkan, Ketua Agensi Pengurusan Bencana Wilayah (BPBD) Klaten, Bambang Riyanto dipetik sebagai berkata, pasukan bertindak BPBD telah mula mengedarkan topeng muka sebagai langkah pencegahan kepada penduduk

PASANGAN suami isteri menunggang motosikal di Balerante, Kemalang, Klaten, Jawa Tengah yang letaknya 3.5 kilometer dari Gunung Merapi, baru-baru ini. – AGENSI

kampung yang terkesan akibat pelepasan debu itu.

“Buat masa ini, semua aktiviti pendakian di gunung itu dihentikan sementara waktu kecuali untuk tujuan penyelidikan,” katanya kepada pemberita di sini hari ini.

Gunung Merapi adalah antara gunung berapi yang masih aktif

di Indonesia dan dilaporkan pernah meletus sebanyak 69 kali sejak 1548.

Letusan yang paling dahsyat dikatakan berlaku pada 1006, 1786, 1822, 1872 dan 1930 yang mengakibatkan 1,400 orang ter bunuh dan 13 perkampungan musnah. – AGENSI

■ BANGKOK 5 JAN.

BANGKOK 5 Jan. - Ribuan penduduk di selatan Thailand mula kembali ke rumah masing-masing dan operasi perniagaan kembali seperti biasa selepas Siklon Tropika Pabuk yang membada negara ini semalam mula masuki Laut Andaman.

Ribut terburuk dalam tempoh 30 tahun yang membawa angin kencang dengan kelajuan 75 kilometer sejam itu mengakibatkan sekurang-kurangnya 30,000 penduduk di selatan Thailand dipindahkan ke pusat perlindungan sementara, semalam.

"Bumbung di beberapa bilik rumah saya hilang dan rumah saya kini dipenuhi lumpur," kata seorang penduduk Teluk Puk, BoonChay Chuayrsri.

Pabuk sebagaimana lapor BBC melalui pantai timur Thailand berhampiran kepulauan Ko Phra Thong pada pukul 7 pagi waktu tempat hari ini dan sedang menuju ke selatan Laut Andaman dan kepulauan Nicobar.

Angin kencang yang dibawa oleh Pabuk turut mengakibatkan pokok tumbang menghempar kabel elektrik sekali gus mencetuskan gangguan bekalan elektrik kepada kira-kira 200,000 orang penduduk.

Sehingga hari ini, kira-kira 30,000 penduduk masih belum menerima sambungan elektrik.

Portal CNN melaporkan, angka korban akibat Siklon Tropika Pabuk meningkat kepada tiga orang termasuk dua warga emas akibat lemas di Nakhon Si Thammarat.

Seorang lagi lelaki juga dikatakan mati selepas dihempar pokok ketika mangsa berada di rumahnya di Nakhon Si Thammarat, bagaimanpun laporan itu masih belum disahkan lagi.

Bagaimanapun beberapa kasus peranginan utama seperti Koh Samui, Koh Phangan dan Koh Tao disahkan selamat daripada tempias ribut kencang ini.

NEW SUNDAY TIMES (SUNDAY VIBES/LIVING): MUKA SURAT 26

TARIKH: 6 JANUARI 2019 (AHAD)

On a sweltering Wednesday in June, a rail-thin woman named Rehmati gripped the doctor's table with both hands. She could hardly hold herself upright, the pain in her stomach was so intense. She'd travelled for 26 hours in a hot oven of a bus to visit her husband, a migrant worker here in New Delhi. By the time she got to the capital, the city was an oven too: 43°C by lunchtime, and Rehmati was in an emergency room.

The doctor, Reena Yadav, didn't know exactly what had made Rehmati sick, but it was clearly linked to the heat. Dr. Yadav suspected dehydration, possibly aggravated by fasting during Ramadan. Or it could've been food poisoning, common in summer because food spoils quickly. Yadav put Rehmati, 31, on a drip. She held her hand and told her she'd be fine. Rehmati leaned over and retched.

Extreme heat can kill, as it did by the dozens in Pakistan in May. But as many of South Asia's already-scorching cities get even hotter, scientists and economists are warning of a quieter, more far-reaching danger: Extreme heat is devastating the health and livelihoods of tens of millions more. If global greenhouse gas emissions continue at their current pace, heat and humidity levels could become unbearable, especially for the poor.

It's already making them poorer and sicker. Like the Kolkata street vendor who squats on his haunches from fatigue and nausea.

Like the woman who sells water to tourists in Delhi and passes out from heatstroke at least once each summer. Like the outdoor workers who become so weak or so sick that they routinely miss days of work, and their daily wages.

"These cities are going to become uninhabitable unless urban governments put in systems of dealing with this phenomenon and make people aware," said Sujata Saunik, who served as a senior official in the Indian Ministry of Home Affairs and is now a fellow at the Harvard University School of

Killer heat

In India, summer heat may soon be literally unbearable, writes Somini Sengupta

Public Health. "It's a major public health challenge."

A recent analysis of climate trends in several of South Asia's biggest cities found that if current warming trends continued, by the end of the century, wet bulb temperatures — a measure of heat and humidity that can indicate the point when the body can no longer cool itself — would be so high that people directly exposed for six hours or more wouldn't survive.

WORRYING SCENARIO

For the country's National Disaster Management Agency, alarm bells rang after a heat wave struck the normally hot city of Ahmedabad, in western India, in May, 2010 and temperatures soared to 48°C. It resulted in a 43 per cent increase in mortality, compared to the same period in previous years, a study by public health researchers found.

Since then, in some places, local governments, aided by the Natural Resources Defense Council, an advocacy group, have put in place simple measures. In Ahmedabad, for instance, city-funded vans distribute free water during the hottest months. In the eastern coastal city of Bhubaneswar, parks are kept open in afternoons so outdoor workers can sit in the shade. Occasionally, elected officials post heat safety tips on social media. Some cities that had felled trees for construction projects are busy planting new ones.

The science is unequivocally worrying. Across the region, a recent World Bank report concluded, rising temperatures could diminish the living standards of 800 million people.

Rohit Magotra, deputy director of Integrated Research for Action and Development, is trying to warn the capital, Delhi, develop a plan to respond to the new danger. The first step is to quantify its human toll. "Heat goes unreported and underreported. They take it for granted," Magotra said. "It's a silent killer."

On a blistering Wednesday morning, with the heat index at 43°C, he and a team of survey takers snaked through the lanes of a working-class neighbourhood in central Delhi. They measured temperature and humidity inside the brick-and-tin apartments. They spoke to residents about how the heat affects them.

"Only by 4am when it cools down, can we sleep," a woman named Kamal told him. Her husband, a day labourer, suffered heatstroke this year, missed a week's work, and, with it, a week's pay.

A shopkeeper named Mohammed Naeem said that while he managed to stay cool in his ground-floor space, his father's blood pressure rose every summer, as he sweated in their top floor apartment all day.

A woman named Abeeda told Magotra that she helped her husband cope during the summer by stocking glucose tablets in the home at all times. Her husband works as a house painter. Even when he's nauseous and dizzy in the heat, he goes to work. He can't afford not to.

Across town, workers covered their faces with bandannas as they built a freeway extension for Delhi's rapidly growing number of cars. The sky was hazy with dust.

Skin rash, dry mouth, nausea, headaches: These were their everyday ailments, the construction workers said. So debilitating did it get that every 10 to 15 days, they had to skip a day of work and lose a day's pay.

Ratnesh Tihari, a 42-year-old electrician, said he felt it getting hotter year by year. And why would that be surprising? He pointed his chin at the freeway extension he's helping to build. "It's a fact. You build a road, you cut down trees. That makes it hotter."

HEAT IS ON

Some cities are getting hotter at different times of year. The average March-to-May summertime heat index for Hyderabad had risen by 0.6 degrees per decade between 1951 and 2010. In Kolkata, a delta city in the east, where summers are sticky and hot anyway, the monsoon is becoming particularly harsh: The city's June-September heat index climbed by 0.26°C per decade.

Joyashree Roy, an economist at Jadavpur University in Kolkata, found that already, most days in the summer are too hot and humid to do heavy physical labour without protection, with wet-bulb temperatures far exceeding the thresholds of most international occupational health standards.

And yet, walk through the city on a stifling hot day in June, and you'll find people pedalling bicycle rickshaws, hauling goods on their heads, constructing towers of glass and steel. Only a few people, like herself, said Roy, are protected in air-conditioned homes and offices. "Those who can are doing this. Those who can't are becoming worse. The social cost is high in that sense."

TINKERING WITH SOLUTIONS

In Ahmedabad, city funds have been used to slather white reflective paint over several thousand tin-roofed shanties, bringing down indoor temperatures. In Hyderabad, a similar effort is being tested. A pilot project by a team of engineers and urban planners covered a handful of tin-roofed shacks with white tarpaulin.

It brought down indoor temperatures by at least two degrees, which was enough to make the intolerable tolerable. Now they want to expand their cool-roof experiment to a 1-square-kilometre patch of the city, installing cool roofs, cool walls and cool sidewalks, and planting trees. Their main obstacle? Funding.

Rajkiran Bilotkar, who led the cool-roof experiment, has a personal stake in the project. As a child, he'd visit his grandfather in Hyderabad. There were trees all over the city. It was known for its gardens. He could walk, even in summer.

Now a professor at the Administrative Staff College of India in Hyderabad, Bilotkar can't walk much. His city is hotter. There are fewer trees. Air-conditioners have proliferated but they spew hot air outside.

Bilotkar says it's hard to persuade policymakers, even the public, to take heat risk seriously. It's always been hot in Hyderabad. It's getting hotter slowly, almost indiscernibly.

At home, he'd resolved not to use his air-conditioner. Through his open windows, though, his neighbour's machine blew hot air into his apartment. His three-year-old daughter became so overheated that her skin was hot to touch. Reluctantly, he shut his windows and turned his machines on.

▲ New Delhi street. Air conditioners contribute to the heatwave by blowing hot air into the city.

Thailand suffers floods and blackouts after storm

NAKHON SI THAMMARAT:

Floods and blackouts caused by Tropical Storm Pabuk left nearly 30,000 people in evacuation shelters across southern Thailand, as relieved tourists stranded on islands further north were spared the worst and began to plot routes home.

Pabuk, a once in three-decades weather system, packed winds of up to 75kph and brought heavy rains and storm surges as it lashed the entire south of the kingdom late on Friday, downing power cables and causing widespread flooding.

A fisherman died in southern Pattani province early Friday as high waves smashed into his boat and another crew member was reported missing.

But the storm tacked away from the key tourist islands of Koh Samui, Koh Phangan and Koh Tao where

large numbers of tourists hunkered down for 24 hours in heavy rains, unable to leave as airports closed and ferry services were cancelled.

"There were no casualties, there is some sunshine today and I'm confident some tourists will be able to leave today as ferries and flights resume," Kittipop Roddon, Koh Samui district chief said.

But "red flag" warnings banning swimming off what are normally sun-baked paradise beaches at this time of year were still in place.

"It's all over. All 10,000 tourists are safe... I am relieved," said Krikrai Songthanee, district chief of neighbouring Koh Phangan, an island famed for its full-moon parties, adding only minor damage had been caused by high winds.

But holidaymakers keen to leave the islands faced long delays as transport networks were slowly

reopened yesterday.

Pabuk made landfall on Friday in Nakhon Si Thammarat province, south of the tourist hubs on the Gulf of Thailand, hammering the coastal province with rain.

Authorities warned of flash floods as some parts remained inundated by a combination of rainfall and storm surges.

Around 200,000 people were left without power as dozens of electricity poles were toppled by high winds or falling trees.

Some 30,000 customers remained without power yesterday, according to an update by the Disaster Prevention and Mitigation Department.

Pabuk struck in peak tourist season, a blow to the cash-cow sector that is integral to Thailand's economy. The kingdom is expected to welcome a record 40 million visitors this year. — AFP

TEMPERATURE RISING

Heatwave wilts Australia's southeast

SYDNEY: A heatwave sweeping Australia engulfed the southeast yesterday, boosting temperature records, spurring fire bans and arousing concern about the health of contestants in this month's tennis Open.

A week after Australia's hottest town, in its northwest, recorded its hottest day, sweltering tem-

peratures arrived on the other side of the continent, pushing the southeastern city of Melbourne to a near-record 42°C.

Regions to the north were expected to be hotter and windier, prompting a fire ban across the state of Victoria.

Nine years earlier, Australia's bushfires killed 180 people near

cities forecast to experience temperatures of 46°C yesterday.

"The conditions are there that if a fire was to start, it could be quite difficult to contain," said Tom Delamotte, a Bureau of Meteorology forecaster.

In Hobart, capital of the nearby island state of Tasmania, which is usually the country's coolest, the

mercury rose as high as 40°C, two degrees from a January record.

Pictures on social media showed a dark-orange sky over Hobart as a bushfire swept the wilderness nearby. Campers were evacuated from the affected area, the Australian Broadcasting Corp said, though no injuries were reported. **Reuters**

Sekurang-kurangnya seorang terbunuh akibat ribut Pabuk yang melanda Teluk Siam yang membawa ombak setinggi lima meter, angin kencang menumbangkan pokok dan bumbung rumah serta banjir akibat hujan lebat semalam.

Menurut kenyataan agensi bencana Thailand, seorang kru bot nelayan terbunuh selepas bot berkenaan karam dipukul ombak dekat pantai wilayah Pattani. Seorang lagi kru masih hilang namun empat lagi nelayan terselamat.

Ribut tropika itu melanda daerah Pale Phanang di wilayah Nakhon Si Thammarat menyebabkan banyak kerusakan.

Sebelum ini, jabatan kaji cuaca memberi amaran 15 wilayah di selatan Thailand

akan dilanda hujan lebat serta angin kencang akibat ribut berkenaan.

Namun, pada petang semalam, kekuatan ribut berkenaan berkurangan ketika

menuju Surat Thani.

"Kekuatannya dijangka menurun menjadi ribut biasa

namun orang ramai masih perlu berhati-hati kerana angin kencang masih mampu memumbangkan pokok serta banjir kilat," kata keenayaan jabatan kaji cuaca.

Pihak berkuda Thailand mengarahkan ribuan penduduk dipindahkan ke pusat perlindungan manakala dua lapangan terbang utama ditutup akibat ribut tropika dengan angin berkelajuan 80 kilometer itu.

"Angin kencang dengan ombak setinggi sehingga lima meter di Teluk Siam dan Laut Andaman. Semua kapal dinasiharkan berlabuh," kata Jabatan Meteorologi Thailand.

Menurut Jabatan Pencegahan dan Pengurangan Bencana, sejak beberapa hari lalu, 6,176 orang dipindahkan

ke pusat perlindungan dari Nakhon Si Thammarat serta wilayah Pattani, Songkhla dan Yala.

Lapangan terbang Nakhon Si Thammarat ditutup dan pergerakan kojrend Nok Airlines Pcl menyatakan ia membatil semua lapan penerbangan keluar masuk dari wilayah itu.

Lapangan terbang Surat Thani juga akan ditutup bermula petang semalam, yang menjelaskan penerbangan Nok Airlines, Lion Air dan Thai Smile.

Terdahulu, Bangkok Airways Pcl turut mengumumkan pembatalan semua penerbangan keluar masuk dari destinasi percutian Koh Samui, termasuk perkhidmatan feri.
