## AstraZeneca vaccine dose intervals: Rep claims some got 3 weeks instead of 12

Published 15 Jun 2021, 8:34 am • Modified 10:43 am

Some recipients of the AstraZeneca vaccine against Covid-19 have received appointments for their second doses that come sooner than the recommended dosing interval, claimed Skudai assemblyperson Tan Hong Pin.

He said he has received several complaints from people whose appointments have been scheduled just three weeks after they received their first dose. All cases involve the vaccine administration centre at Persada Johor International Convention Centre...
