M'sia developing mRNA Covid-19 vaccine - Adham

Bernama

Published 21 Jun 2021, 8:09 pm

Malaysia is developing a Covid-19 vaccine using the messenger ribonucleic acid (mRNA) technology.

The Malaysian Institute for Medical Research (IMR) started developing it with Universiti Putra Malaysia (UPM) in November 2020, said Health Minister Dr Adham Baba in a joint press conference with National Covid-19 Immunisation Programme coordinating minister Khairy Jamaluddin, today.
