Huawei Asia Pacific Digital Innovation Conference helps promote the development of the digital economy in the Asia Pacific region

(Singapore, 19th) Hu Houkun, rotating chairman of Huawei, said that the Asia-Pacific region is one of the most active regions in the development of the global digital economy, playing an important role in the growth of the world economy, but also actively promoting the process of digitalization and exploring innovation.

He said that currently, Asia-Pacific countries are actively promoting the process of digitalization around the two major trends of digitalization and low-carbon development. Many Asia-Pacific countries have elevated digital transformation to a strategic policy level and are taking practical actions, including Indonesia's digital policy, Malaysia's MyDIGITAL, Thailand's digital hub, and South Korea's digital new deal.

"These developments are accelerating the deployment of digital infrastructure in the relevant regions and laying a solid foundation for a strong digital economy. Huawei has served in Asia Pacific for 30 years, and we are honored to be deeply involved and witness the remarkable progress of digitalization in Asia Pacific."

Hu Houkun today attended the opening ceremony of the "2022 Huawei Asia Pacific Digital Innovation Conference" jointly organized by Huawei and the ASEAN Foundation, and delivered the above speech through an online live broadcast. Attendees included Lin Bofeng, President of Huawei Asia Pacific, Dr. Yang Meiyang, CEO of ASEAN Foundation, and Dato Seri Aham Baba, Minister of Science, Technology and Innovation of Malaysia.

Hu Houkun said that the Asia-Pacific region is going green and all countries are committed to sustainable development. Among them, Thailand and Japan are committed to achieving carbon neutrality by 2050, Singapore is committed to peak emissions by 2030, and China will also commit to peak carbon emissions by 2030 and carbon neutrality by 2060. Digital technology will be a key enabler of the entire process.

"Facing the future, Huawei will continue to innovate and invest in the direction of digitalization and low-carbonization. In 2022, Huawei is committed to supporting the construction of Digital Asia Pacific by building leading digital infrastructure, helping low-carbon development, and enhancing digital inclusion. We look forward to working with Asia-Pacific governments, customers and partners to build a prosperous and sustainable Asia-Pacific."

The above-mentioned two-day event was held at the Marina Bay Sands Convention and Exhibition Center in Singapore. More than 1,500 government officials, experts, scholars, partners, and analysts from more than 10 countries in the Asia-Pacific region were invited to participate in this conference.) continue to innovate, accelerate the digitalization of the industry, help green and low carbon, and explore new scenarios and directions for digital economy and industrial innovation.

Yang Meiyang said that this year's Huawei Asia Pacific Digital Innovation Conference is another key milestone in the partnership between the ASEAN Foundation and Huawei. The two sides will strengthen cooperation and continue to build an ecosystem focusing on talent development to help solve the digital skills shortage in the Asia-Pacific region.

Lin Baifeng said that the Asia-Pacific region is full of huge opportunities for digital transformation. Huawei has always adhered to the principle of "In the Asia-Pacific, for the Asia-Pacific", and is committed to becoming a key contributor to the Asia-Pacific digital economy and building a beautiful green digital life with customers and partners.

"Huawei will help Asia-Pacific build a leading and green digital infrastructure cornerstone, and will work with the industry into the future to build an inclusive and sustainable digital Asia-Pacific."
