KUALA LUMPUR (Dec 27): The National Biotechnology Agency of Malaysia, Solutions Biologics Sdn Bhd (SOLBIO) and CanSino Biotech signed a memorandum of understanding on Wednesday (Dec 25), with Science, Technology and Innovation Minister Datuk Seri Aham Baba and China Tang Rui, Minister of the Chinese Embassy in Malaysia, attended the testimony and delivered speeches.

The Chinese embassy in Malaysia recently posted on Facebook. In his speech, Tang Rui said that the Chinese government attaches great importance to the cooperation in vaccine research and development between Malaysia and China, and actively promotes the connection between enterprises and scientific research institutions of the two countries. The signing of the memorandum marks the substantial progress of the cooperation between the two sides. .

He hoped that Malaysia's "National Vaccine Development Direction Blueprint" would be realized as soon as possible through the cooperation in vaccine research and development between the two countries, and the vision of producing vaccines for human use within ten years was described.

Aham Baba said that after the release of the above blueprint, the Ministry of Science and Technology established the Institute of Genetics and Vaccines to lead the research and development of human vaccines. The development of local vaccines in line with international standards has laid a solid foundation and pointed out the direction.

During the event, the guests also watched the demonstration of CanSino's latest inhaled new crown vaccine.
