## Hardware and equipment upgrades Use technology to develop Beihai Maiman Zhenhua small perfect transformation

June 18, 2022

**Beihai Maiman Zhenhua Primary School, 10 years of transformation, is the hard work of Sangou and the teaching staff.**

**Reporter: Wang Shuzhen**

Beihai Maiman Zhenhua Elementary School has never been favored, except for the schools flooded by rain, the facilities are not perfect, and the parents are unwilling to send their children to study. After 8 years of hard work by Dong's tutor and the alumni association, it has achieved a perfect transformation.

Today, the school's hardware and equipment have been upgraded, and even in the development of technology application, it is at the forefront of the Chinese primary schools in the district, and the school's software facilities are continuously increasing.

The school is also full of freshmen in the first-year group and pre-school education classes in the next year and next year.

### **Yang Shifeng: Strengthening traditional values**

#### **Cultivate talents to create superior character**

Chairman Zhun Datuk Yang Shifeng revealed in an interview with Guanghua Daily that over the years, the persistent move to reform education has only served one purpose, providing a diverse platform and a broader stage.

He said that the three institutions of the school allow students to be exposed to different affairs as much as possible, and plant the germinating seeds for their potential and talents, in the hope that a hundred flowers will bloom and a hundred Wuwu will contend in the future. foundation, and know their future direction.

"Upholding Confucian thinking, creating a science and technology campus, strengthening traditional values, cultivating talents from all walks of life, and shaping excellent character, this is the single-minded effort of Maixiaosan Institution to make students turn into butterflies."

He said that Mai Xiao is the first among primary schools in Penang to promote and organize the establishment of STEM classrooms, so that students have the opportunity to learn about programming with new technologies.

"Smart Aquaponics Program, AI Artificial Intelligence Science Room, Frog Classroom, Face Recognition Registration, and Smart Broadcasting Room and Smart Craft Room sponsored by Haoyang Company have gradually emerged, and students have more choices on the way to learn science and technology."

He said that through the teaching goals of STEM Lab, students with good grades may not be able to be equally good, but students with

average grades on weekdays, their performance in creative learning, reform and change, communication and coordination, and this aspect are impressive.

**Chairman Yang Shifeng and President Ye Huijun: The improvement of hardware, especially the application of technology, will help to discover students' talents other than reading and writing.**

### **Principal Ye Huijun: Create a suitable environment**

#### **Make the campus colorful**

Principal Ye Huijun believes that creating a campus environment suitable for the school is one of the ways to drive change. The campus environment allows students to show their love for the school from the bottom of their hearts, and to regard the school as their home.

"The three institutions of the school have made great efforts in the renovation of the campus, making the campus colorful, and stepping into Mai Xiao is a happy mood."

The principal said that education in the 21st century can no longer

be cramming-style teaching. Students' personal practice is the best way to learn, and only with a good environment can they practice and create infinite possibilities. Therefore, the school has themed toilets, murals, negative ion fish ponds, etc., all to create a better learning and teaching atmosphere.

**The colorful campus allows students to cheer up and come to class.**

"Mai Xiao's nutritious meal, when promoting, many people only see the mandatory side, but they don't understand the balanced nutrition behind it. Equality and justice because everyone is the same, cherish the ingredients and don't waste food, everyone must have CDs, Pay attention to nutrition, meat and vegetables, and not picky eaters, and also pay attention to BMI management. This is the message to be conveyed."

The principal said that after pushing the nutritious meal for a long time, the feedback from the parents was positive. The parents found that their children started to eat vegetables and stopped

being picky eaters. They also knew that they were grateful and cherished food and did not waste it for no reason. This is the transmission and cultivation of correct beliefs.

**Nutritious meals not only teach students to CD and cherish food sources, but also let children change their picky eating habits.**

### **Promote aquaponics program**

"The school promotes the aquaponics program, and students participate in it with practical actions, let them try to grow fish, learn management and marketing, how to operate without loss, and how to make profits for the next planting and breeding, these are all It's learning outside of the classroom."

Most importantly, with the help of a group of teachers and caring parents who are silently contributing during the holidays and weekends, the aquaponics program can not stop.

The principal said that in order to give students a sense of giving and receiving, the school implements a food bank program,

supports the Heng Ai Special Children Training Center to purchase healthy bread, and the Rumah Amal Kulim Special Children Center in Kedah to purchase organic compost.

The continued development of the aquaponics program also includes the follow-up management, packaging and marketing, which is learning beyond the classroom.

The fruit and vegetable garden is the fruit of the hard work of teachers and students, and it also allows students to take the school as their home.

### **Outstanding results in various off-campus competitions**

Mai Xiao's outstanding achievements include winning the champion of the Quan Penang Primary School/Weibei County Primary School Group Outstanding Library Award in 2021, the Penang State Education Bureau Student Affairs Excellence Award (Drinking Water Video) and (Model Toilet), and the Weibei County Extracurricular Award. The event awards the top three in the primary school group.

The school's campus video "I love Maiman Zhenhua Primary School" has been viewed more than 29,000 times. It was selected to participate in the Malaysian Chinese Primary School Love School

Program 2.0, and the Student Affairs Department of the Penang State Education Bureau issued a rating certificate for the cleanest semester education class in Penang Primary School and The toilets for primary school students were further awarded as model toilets by the Penang State Education Department.

In addition, Principal Ye Huijun served as one of the keynote speakers of the group grid in the group webinar "Quality Management for VUCA".

Principal Ye was also selected by the Ministry of Education and became the only Chinese primary school principal in the country to participate in the production and editing of the short film "Leadership Management Course". At the same time, it won the 2022 Primary School Principal's Special Leadership Award and the 4th Outstanding Service Award.

In 2020, Mai Xiao was awarded the BeSS Certificate of Accreditation by the Ministry of Health of Malaysia, which is a recognition of the school's clean, safe and healthy "nutritious meals".

Other awards include the consolation prize in the Covid 19 Video Production Contest and the third runner-up in Penang Green Technology Design and Innovation. Chief Minister Cao Guan You also recommended five green activities for Mai Xiao.

In 2019, the school also won the first runner-up in the primary school group of the Green School Competition in Wisconsin, the special community award of the Penang Green Award, the Bronze Award of Agricultural Technology in the Penang International Science Fair, and the only Chinese primary school in the 2025 School Transformation Plan 4.0 in Weibei County.

**The toilets are clean and bright, accompanied by cartoons, to eliminate the psychological pressure of the students.**
