

THE TECHNICAL TESTING AND ANALYSIS SERVICES SUBSECTOR

The Technical Testing and Analysis Services Subsector comprises the following services:

Subclass: 86761 - Composition And Purity Testing And Analysis Services

Testing and analysis services of the chemical and biological properties of materials such as air, water, waste (municipal and industrial), fuels, metal, soil, minerals, food and chemicals. Included are testing and analysis services in related scientific fields such as microbiology, biochemistry, bacteriology, etc. Excluded are medical and dental testing services.

Subclass: 86762 - Testing And Analysis Services Of Physical Properties

Testing and analysis services of physical properties such as strength, ductility, electrical conductivity and radioactivity of materials such as metal, plastics, textiles, woods, glass, concrete and other materials. Included are tests for tension, hardness, impact resistance, fatigue resistance, and high-temperature effects.

Subclass: 86763 - Testing And Analysis Services Of Integrated Mechanical And Electrical Systems

Testing and analysis services of the mechanical and electrical characteristics of complete machinery, motors, automobiles, tools, appliances, communication equipment and other equipment incorporating mechanical and electrical components. The results of the testing and analysis generally take the form of an assessment of the performance and behavioural characteristics of the object tested. Tests may be performed using models or mock-ups of ships, aircraft, dams, etc.

Subclass: 86764 - Technical Inspection Services

Testing and analysis services of a technical or scientific nature which do not alter or affect the object being tested. Included are radiographic, magnetic, and ultrasonic testing of machine parts and structures conducted in order to identify defects. These tests are often conducted on site. Excluded are inspection services of a non-technical or scientific nature, such as visual inspection of buildings, machines, etc.

Subclass: 86769 - Other Technical Testing And Analysis Services

All other technical testing and analysis services not elsewhere classified.

LIBERALISATION OF THE TECHNICAL TESTING AND ANALYSIS SERVICES SUBSECTOR

On April 22, 2009 the Government had further liberalised this subsector to attract more foreign investments and bring more professionals and technology, as well as strengthen competitiveness. There are NO **equity requirements** imposed on service providers intending to establish commercial presence.

Licences/Approval/Recognition Issued by Federal Government's Agencies / Ministries

Companies intending to carry out testing and analysis activities that are regulated are required to obtain licence / approval / recognition from the relevant **Federal Government's Agencies / Ministries** such as:

Activities	Federal Government's Agencies /Ministries	Website
Radioactive laboratory and other activities covered by the Atomic Energy Licensing Act (Act 304)	Atomic Energy Licensing Board	http://www.aelb.gov.my/aelb/engv/text/recognition.asp http://www.aelb.gov.my/aelb/engv/text/licence.asp
Surveying or testing any oil palm product	Licensing Unit, Malaysian Palm Oil Board	http://mpob.gov.my/#
Surveying or testing any biofuel, biofuel blended with any other fuel or biofuel blended with any other biofuel	Biofuel Licensing Task Force Ministry of Plantation Industries and Commodities Malaysia	http://www.kppk.gov.my/
Tests for Health Certificate applications for the purpose of food export	Food Safety and Quality Division, Ministry of Health Malaysia	http://fsq.moh.gov.my/v2/

Before issuing the relevant licence / approval / recognition, regulating Agencies/Ministries may impose mandatory accreditation requirements to ensure:

- (i) industrial efficiency;
- (ii) regulations for safety, health and environmental protection are enforced; and
- (iii) consumers' interests are protected.

STANDARDS MALAYSIA is responsible for processing applications for accreditation and their submission to the Director General of the Department of Standards Malaysia who, in successful cases, issues certificates of accreditation.

ACCREDITATION

STANDARDS MALAYSIA accreditation service is open to and accessible by any applicant (local or foreign). Applicant must fulfill the accreditation conditions specified and published by STANDARDS MALAYSIA. Accreditation criteria, policies and procedures apply in a consistent and uniform manner to all applicants and accredited bodies, irrespective of the bodies' affiliation or ownership. Two schemes that are relevant to Technical Testing And Analysis services providers are:

(I) SAMM (Skim Akreditasi Makmal Malaysia – Malaysia Laboratory Accreditation Scheme)

SAMM (Skim Akreditasi Makmal Malaysia) is a national laboratory accreditation scheme.

- SAMM is open to any testing laboratory or calibration centre irrespective of its application - private, government or in-house.
- SAMM accredits almost every testing facility and technology - from chemical testing to engineering.
- SAMM only accredits those facilities that meet all its criteria for testing competence and sound laboratory practice.
- SAMM rigorously examines and re-examines every accredited facility.

A Laboratory must be able to demonstrate:

- Competence to perform specific tests, measurements or calibration
- Sound laboratory management
- Suitable, qualified and trained staff
- Proper equipment management and adherence to calibration and maintenance programmes.
- Accurate and complete record keeping
- Adequate quality control and quality assurance procedures.
- Adherence to internal audit programme.
- Appropriate facilities for the handling, storage and testing of samples.
- Assurance on essential consumables and outside support services.
- Not just an interest, but a commitment to doing things right.

(II) Malaysia Inspection Bodies Accreditation Scheme (MIBAS)

Accreditation scheme for inspection bodies is applicable to all organisations providing inspection activities. With accreditation, inspection bodies receive formal recognition of their expertise, competence, quality systems, procedures, equipment and facilities based on independent assessment. The scheme is managed by Department of Standards Malaysia.

MIBAS is relevant to Technical Inspection Service Providers.
